		CP- 050057	CRs to R99 WI "ASCI" for TSs 03.68, 43.068, 03.69 and 43.069	CT1	The ASCI CRs in CP-050057 assume that the corresponding stage 1 change is also approved, so CT1 is asking for conditional approval on the condition that the also the stage 1 CR goes through in the SA plenary next week.
		CP- 050058	CRs for Rel-4 WI "GSM710" for TS 24.008	CT1	CP-050058 contains change of definition in GSM 700 frequency bands. The CRs on frozen releases are justified by the change in Rel-7 to add the new GSM 710 frequency band.
7.18	CRs from the Open Mobile Alliance				
8	Release 5				NOTE - Rel-5 IS FROZEN ONLY CAT F and CAT A CRS ALLOWED
8.1	Provisioning of IP-based multimedia services [IMS]				
		CP- 050059	CRs on Rel-5 WI "IMS-CCR" for TSs 24.229 and 24.228	CT1	The only Rel-5 CRs from CT1 to this meeting are in the IMS CR pack CP-050059. This CR pack corrects the handling of Reg-Await-Auth timer, security association at P-CSCF, use of default port, Authorization header, handling of error cases both at P-CSCF and I-CSCF, implicitly registered public user identities and registration procedures at I-CSCF. There are three CRs with no mirror CR in this pack. Justification of 24.228 CR as an essential correction may be debatable, but at least formally the TS is normative, and therefore the CR was agreed as an essential one. In case of CT1 CR C1-050685 and C1-050780 the Rel-6 requirements already differ from Rel-5, so therefore no Rel-6 mirror CR is

9.1	IMS Phase 2 [IMS2]	CP- 050060	CRs on Rel-6 WI "IMS2" TSs 24.247, 24.147 and 24.167	CT1	IMS phase 2 CRs are provided in two documents, CP-050061 contains the 24.229 CRs and CP-050060 the rest. CP-050060 corrects the list server behaviour as well as references in messaging and conferencing. The management object CRs align the MO defined in 24.167 better with OMA DM framework
		CP- 050061	CRs on Rel-6 WI "IMS2" for TS 24.229	CT1	CP-050061 contains the 24.229 CRs that correct the SIP profile tables, registration procedures of implicitly registered public user identities and multiple registration, PSI routing, references and the handling of various error cases. They also clarify the UA role of the network elements and the handling of notification to de-registered user at S-CSCF and align the wording to the drafting rules.

		CP- 050063	CRs on Rel-6 WI "PRESNC" for TS 24.141	CT1	The presence CRs in CP-050063 update several references and correct the terminology in Service Point Trigger, as the old SPI is not defined. The title of C1-050690 did raise some discussion on the justification for the change. The name describes the nature of the straightforward changes quite well and as some of the changes do affect the message syntax it was considered that category F is appropriate.
9.3	Security Enhancements[SEC1]				
		CP- 050066	CRs on Rel-6 Rel-6 WI "SEC1-SC" for TS 24.109	CT1	The four subscriber certificates CRs under security work item that affect TS 24.109 are in CP-050066. These CRs define the lifetime value in UTC, correct the user identity reference and align 24.109 with 33.220.

Agenda	Agenda Item Title	Tdoc	Document Title	Source	Notes	
		CP- 050062	CRs on Rel-6 WI "MBMS" for TS s 24.008 and 44.065	CT1	There are two MBMS CRs for approval in CP-050062. The CRs in this pack add the indication of the UE MBMS capability and the cover one CT1 extension item by adding the compression to MBMS.	
					SA4 have opened up a new concept in MBMS session validity period and CT1 is not aware of sufficient documentation of requirements in this area to complete the corresponding stage 3 work.

9.17	WLAN [WLAN]				
		CP- 050064	CRs on Rel-6 WI "WLAN" for TSs 24.234 and 24.229	CT1	The majority of the WLAN CRs are provided for approval in CP-050064. These CRs consider Wa and Wd reference points equal to make no distinction between the home and roaming scenario, bring the scope of 24.234 up to date and re-arrange the definitions and references. The last CR of the pack puts a limit to the maximum number of IPSec tunnels per IKE as requested by SA3.
		CP- 050065	CR on Rel-6 WI "WLAN" for TS 24.234	CT1	The standalone CR C1-050726 in CP-050065 was split to separate CR pack since CT1 wants to ask for conditional approval of the CR. This stage 3 WLAN CR cover the open item identified by GSMA in their LS but it also needs the corresponding stage 2 CR from CT4 23.003 to define the structure of the W-APN field.

		050068	23.122 and 24.011		packs. CP-050068 is on the PLMN selection. Here the state diagram in 23.122 is aligned with the text in the same TS and introduce also in A/Gb mode the concept of implicit CP-ACK which already exists in Iu mode.

Agenda	Agenda Item Title	Tdoc	Document Title	Source	Notes
		CP- 050069	CR to Rel-6 WI "TEI6" for TS 24.008	CT1	Most 24.008 CRs have been collected in CR pack CP-050069. These include clarification of the handling of shifted IEs where no checking of comprehension required information elements is performed, allow the UE to perform RAU to re-negotiate its configuration, GERAN requested extension of high multislot classes, correction to numbering of some figures, handling of the duplicated RAU requests due to retransmissions, allowing the lower layers to trigger cell update, correction to former CN1 CR on the use of code point 'no identity' in mobile identity and discontinuing the use of the code point GPRS attach while IMSI attached in attach type IE.
		CP- 050070	CR to Rel-6 WI "TEI6" for TS 24.008	CT1	Revised to CP-050207 before presentation CR pack CP-050070 is split to standalone document as this CR on service based handover request is related with exchange of liaisons between different working groups. No formal linkage to any other CR was defined in the CT1 meeting, but it is expected that other related CRs will be submitted to the same plenary from the other CT working groups.
		CP- 050207 CP- 050071	CR to Rel-6 WI "TEI6" for TS 24.008 CR to Rel-6 WI "TEI6" for TSs 24.008 and 23.009 (SCUDIF related CRs)		Revision of CP-050070 All SCUDIF related CRs are contained in CP-050071. There is no Rel-6 work item for SCUDIF, so TEI-6 was used instead for these CRs which add the network initiated service upgrade of SCUDIF call. There is no formal list of dependencies between the SCUDIF related CRs but they were requested to be handled together in the plenary. The 23.009 CR contained in this CR pack was endorsed by CT4 during the WG meeting week.

This WI is proposed to focus on the interaction between CS and PS domain in CSI service and new TR is started to document that. Changes on the existing main protocol specifications in CS domain and IMS are also foreseen. The WI is aiming at completion in December 2005. EVGCS enhancements related CRs are provided for approval CP-050073. These CRs start adding the new functionality for privileged talker and emergency calls. There is also an optimization of broadcast point from MSC to BSC to optimize the A-interface traffic for VBS and VGCS.
