		<u>CP-</u> 050058	CRs for Rel-4 WI "GSM710" for TS 24.008	CT1	CR goes through in the SA plenary next week. Approved CP-050058 contains change of definition in GSM 700 frequency bands. The CRs on frozen releases are justified by the change in Rel-7 to add the new GSM 710 frequency band.
7.18	CRs from the Open Mobile Alliance				
8	Release 5				NOTE - Rel-5 IS FROZEN ONLY CAT F and CAT A CRS ALLOWED

Agenda	Agenda Item Title	Tdoc	Document Title	Source	Notes
8.1	Provisioning of IP-based multimedia services [IMS]				
		<u>CP-</u> 050059	CRs on Rel-5 WI "IMS-CCR" for TSs 24.229 and 24.228	CT1	Approved
					C1-050777 in this doc and C1-050717 in CP-050061 are overlapping
					C1 050777 in CP 050059 and C1 050717 in CP 050061 merged into CP 050215
					Revised to CP-050213
					The only Rel-5 CRs from CT1 to this meeting are in the IMS CR pack CP-050059. This CR pack corrects the handling of Reg-Await-Auth timer, security association at P-CSCF, use of default port, Authorization header, handling of error cases both at P-CSCF and I-CSCF, implicitly registered public user identities and registration procedures at I-CSCF.
					There are three CRs with no mirror CR in this pack. Justification of 24.228 CR as an essential correction may be debatable, but at least formally the TS is normative, and therefore the CR was agreed as an essential one. In case of CT1 CR C1-050685 and C1-050780 the Rel-6 requirements already differ from Rel-5, so therefore no Rel-6 mirror CR is needed.

		0.0	networks signalling protocols" CRs on Rel-6 WI "PRESNC" for TS	074	Assessed
		<u>CP-</u> 050063	24.141	CT1	Approved
					The presence CRs in CP-050063 update several references and correct the terminology in Service Point Trigger, as the old SPI is not defined. The title of C1-050690 did raise some discussion on the justification for the change. The name describes the nature of the straightforward changes quite well and as some of the changes do affect the message syntax it was considered that category F is appropriate.
9.3	Security Enhancements[SEC1]				
		<u>CP-</u> 050066	CRs on Rel-6 Rel-6 WI "SEC1-SC" for TS 24.109	CT1	Approved

					<u>CP-</u> 050064	CRs on Rel-6 WI "WLAN" for TSs 24.234 and 24.229	CT1	Approved
								The majority of the WLAN CRs are provided for approval in CP-050064. These CRs consider Wa and Wd reference points equal to make no distinction between the home and roaming scenario, bring the scope of 24.234 up to date and re-arrange the definitions and references. The last CR of the pack puts a limit to the maximum number of IPSec tunnels per IKE as requested by SA3.
					<u>CP-</u> 050065	CR on Rel-6 WI "WLAN" for TS 24.234	CT1	Approved
								The standalone CR C1-050726 in CP-050065 was split to separate CR pack since CT1 wants to ask for conditional approval of the CR. This stage 3 WLAN CR cover the open item identified by GSMA in their LS but it also needs the corresponding stage 2 CR from CT4 23.003 to define the structure of the W-APN field.
