Title: Proposed liaison to TSG SA on the ITU-R TG 8/1 revision of Recommendation M.1079
Document for: Approval
Agenda Item: 6.5.3

At the last TSG RAN plenary a liaison statement (TSGR#5(99)372) was sent to TSG SA on the revision of Recommendation M.1079 (“Performance and Quality of Service Requirements for International Mobile Telecommunications-2000 (IMT-2000)”, attached to the above mentioned liaison).

TSG SA was kindly required to develop detailed contribution(s) to comment and propose changes to the available version of Recommendation M.1079.

This activity was carried out by SA4 who developed some material that was forwarded to SA2 (TSGS4#6(99)253R). Unfortunately, the material was not addressed by SA2.

Since the schedule within ITU-R TG8/1 is to finalize the revision on the Recommendation M.1079 at the next TG8/1 meeting (Helsinki, October 25 – November 5, 1999), it is extremely urgent to approve the material developed within TSG SA SA4.

Therefore, TSG RAN kindly ask TSG SA to finalize this material and to send it to the ITU Ad Hoc Contact Person (nicola.magnani@cse.lt.it) no later than October, 13 for the submission to ITU-R TG 8/1.
