

Technical Specification Group, Radio Access Network Meeting #5, Korea, 6 - 8 October 1999 **TSGR#5(99)534**
(TSGR-ITU#2(99)088)

Source: ITU Ad Hoc Contact Person
Title: Proposed letter to Organizational Partners on references in section 5.x.3 of IMT.RSPC
Document for: Discussion and Approval
Agenda Item: 6.5.3

3GPP Radio Interface Specifications will be incorporated by reference in ITU-R's Draft New Recommendation "Detailed Specifications of the Radio Interfaces of IMT-2000" (IMT.RSPC) that is going to be approved at the 18th Meeting of ITU-R Task Group 8/1 in Helsinki, Finland, on 25 October - 5 November 1999.

At the meeting between ITU and SDO representatives [1] it was indicated that IMT.RSPC should use reference to SDO material, rather than referring directly 3GPP material.

3GPP TSG RAN prepared the attached contributions containing the list of Specifications (titles and short synopsis) to be included in section 5.x.3 of IMT.RSPC (for the FDD and TDD components).

Each SDO is kindly requested to fill in the tables in the attached contributions with the relevant references and to forward the complete document to ITU-R TG 8/1 in time for their next meeting.
