

Source: ITU Ad Hoc
Title: 3GPP Radio Interface Specifications
Document for: Discussion and Approval
Agenda Item: 6.5.3

3GPP Radio Interface Specifications will be incorporated in ITU-R's Draft New Recommendation "Detailed Specifications of the Radio Interfaces of IMT-2000" (IMT.RSPC) at the 18th Meeting of ITU-R Task Group 8/1 in Helsinki, Finland, on 25 October - 5 November 1999.

To this end, the 3GPP Radio Interface Specifications must be contributed to the Helsinki meeting to ensure that material for referencing is available, that other specification material is available for consultation, and to guard against the small but finite possibility that the reference approach might not be feasible.

This draft contribution provides a proposed contribution which would act as a cover page or introduction to the complete set of agreed 3GPP specifications which will be provided to Task Group 8/1 in October 1999, in [CD-ROM and paper] format. It ensures that the 3GPP specifications are available for discussion, adoption etc at the Helsinki meeting.

The proposed contribution, consisting of Summary, Annex containing the body of the contribution, and attachment (3GPP specifications, to be provided in mid-October when available) is attached. This would be sent to Task Group 8/1 shortly before the opening of the meeting.

[3GPP MEMBER, OR ADMINISTRATION][#]
3GPP RADIO INTERFACE SPECIFICATIONS

Summary

This document contains the 3GPP radio interface specifications [Version xx, agreed on yy October].

These should be incorporated in the "Recommendations" section of Draft New Recommendation "Detailed Specifications of the Radio Interfaces of IMT-2000" (IMT.RSPC).

Annex: 1

Attachment: 1 to Annex 1

[#] This contribution was developed in 3GPP TSG RAN-~~ITU Ad-hoc~~

ANNEX

3GPP Radio Interface Specifications

Introduction

This document contains the 3GPP IMT-2000 radio interface specifications agreed by [3GPP TSG on xx October 1999], for incorporation in the "Recommendations" section of Draft New Recommendation "Detailed Specifications of the Radio Interfaces of IMT-2000" (IMT.RSPC).

Proposal

The 3GPP radio interface specifications contained in Attachment 1 should be incorporated in the "Recommendations" section of Draft New Recommendation "Detailed Specifications of the Radio Interfaces of IMT-2000" (IMT.RSPC).

Attachment 1 to Annex 1

- Detailed 3GPP Radio Interface Specifications in [CD-ROM and paper] format, [Version xx, yy October 1999].

[Include / attach these specifications after agreement in 3GPP, October 1999]
