Title: ⌘	Removal of remaining open item	
Source: ⌘	R-WG3	
Work item code: ⌘	LCS1-UEPos-Iublur	***Date:*** ⌘ August 2001
Category: ⌘ **F**		***Release:*** ⌘ REL-4

Use one of the following categories: ***F*** *(essential correction)* ***A*** *(corresponds to a correction in an earlier release)* ***B*** *(Addition of feature),* ***C*** *(Functional modification of feature)* ***D*** *(Editorial modification)* Detailed explanations of the above categories can be found in 3GPP TR 21.900.	*Use one of the following releases:* *2 (GSM Phase 2)* *R96 (Release 1996)* *R97 (Release 1997)* *R98 (Release 1998)* *R99 (Release 1999)* *REL-4 (Release 4)* *REL-5 (Release 5)*

Reason for change: ⌘	During the R3#21 meeting one of the remaining open item in the TR25.850 'Can the GSM cells be measured as neighbouring cells for UE positioning' was discussed. As a conclusion it was decided, that measurements on GSM cells would be quite less accurate than on UTRAN cells and therefore this issue does not need to be investigated further.
Summary of change: ⌘	This contribution removes this remaining open item related to GSM cell measurements from the TR.
Consequences if not approved: ⌘	Open items remains there in the TR. Backward compatibility: This CR is backward compatible.

How to create CRs using this form:

Comprehensive information and tips about how to create CRs can be found at: http://www.3gpp.org/3G_Specs/CRs.htm. Below is a brief summary:

1) Fill out the above form. The symbols above marked ⌘ contain pop-up help information about the field that they are closest to.

2) Obtain the latest version for the release of the specification to which the change is proposed. Use the MS Word "revision marks" feature (also known as "track changes") when making the changes. All 3GPP specifications can be downloaded from the 3GPP server under ftp://www.3gpp.org/specs/ For the latest version, look for the directory name with the latest date e.g. 2000-09 contains the specifications resulting from the September 2000 TSG meetings.

3) With "track changes" disabled, paste the entire CR form (use CTRL-A to select it) into the specification just in front of the clause containing the first piece of changed text. Delete those parts of the specification which are not relevant to the change request.

6.2.3   Open items

Following open items are identified:

1) ~~Can the GSM cells be measured as neighbouring cells for UE positioning?~~

2) Mapping and accuracy of the SFN-SFN Observed Time Difference UTRAN measurement. Is there a need to report the accuracy of this measurement?

3) Accuracy of the $T_{UTRAN-GPS}$ UTRAN measurement.
