

Status report of RAN WG2 to RAN #15

Denis Fauconnier

RAN WG2 Chairman

RP-020060

Main activities since last RAN Plenary

- **Release 99 corrections**

- Occupied 75% of last meeting => decreasing 😊
- Most corrections on aspects which were not described, unclear, or incorrect. Level of impact of CRs is decreasing except on security
- Identified security open issues were all resolved 😊
- measurement alignment resolved with RAN1.
- One consensus missing on UP 😞
- Isolated impact analysis is more detailed. Expected to become rule.

- **RABs and RBs for release 99**

- CR to 34.108 sent to T1; joint with RAN1.

- **Release 99 clean-up**

- One joint meeting with RAN1

- **Some Release 4 corrections**

- **Release 5**

- One meeting dedicated to Release 5

NORTEL HSDPA completed!! CRs on WI under other WGs agreed.

RP-020060

RAN WG2 statistics

Meetings held since last RAN Plenary

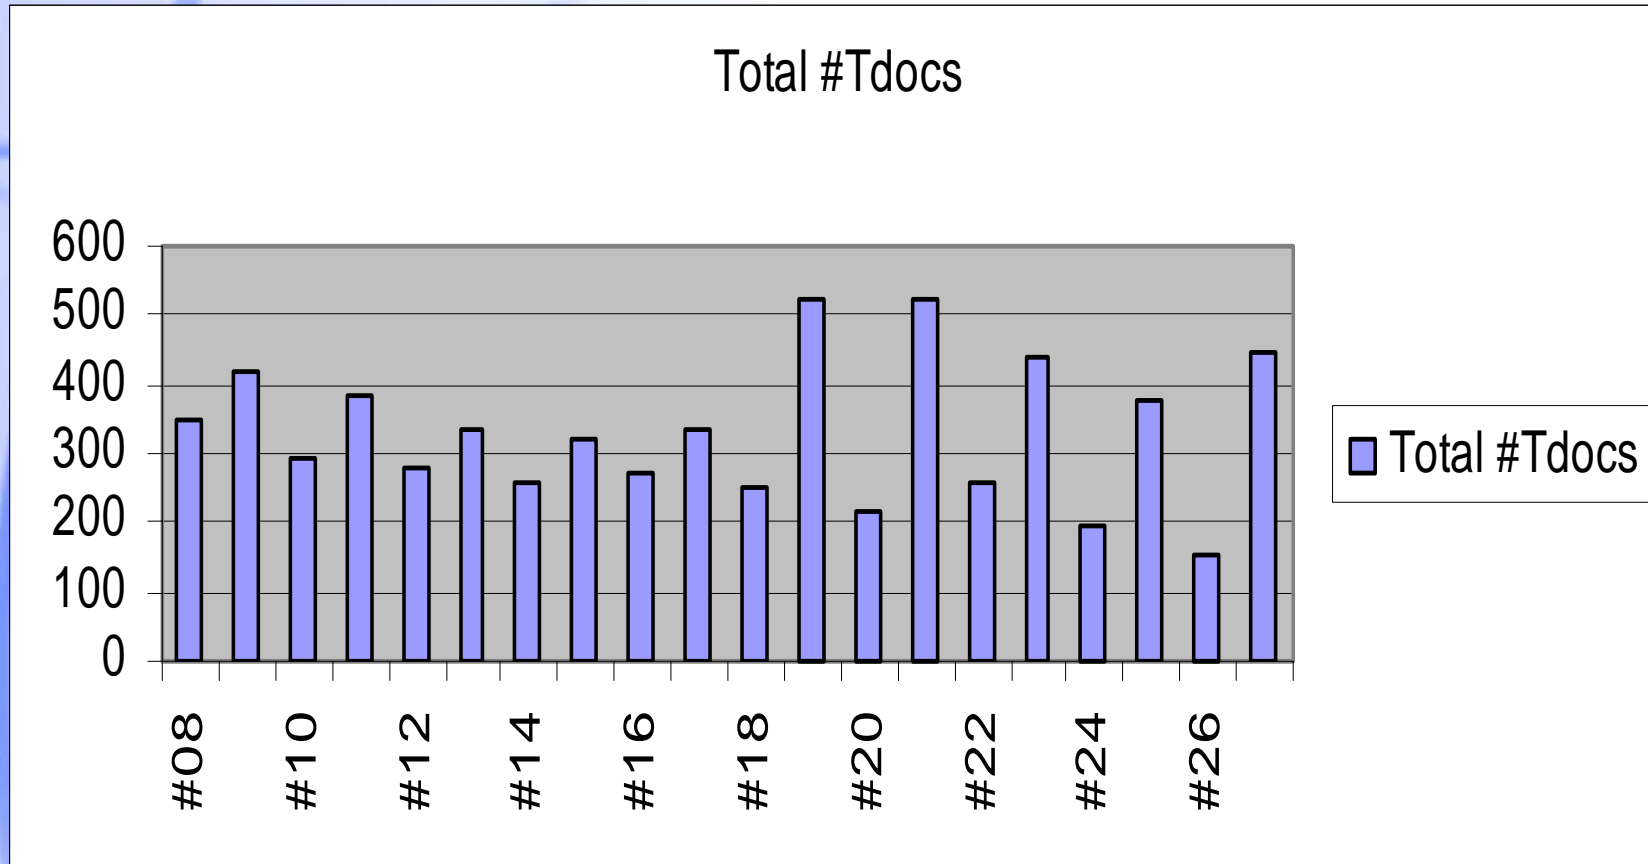

- RAN WG2#26 in January on Release 5
- RAN WG2 #27 in February
- One joint meeting with RAN1 on Release 99 clean-up and 34.108
- Several joint meetings during RAN WG2 #27 to resolve some subjects (HSDPA, measurements)

Liaison statements In/Out

Total number of documents per meeting

Rel 99 Change Request statistics (1)

Rel 99 Change Request statistics (2)

Release 99 activities

RP-020060

RLC

- **Protocol is stable; description is improved to ease interoperability and cover all cases unambiguously**
- **Some minor corrections**
- **Enhancements are pushed to R4**

MAC/BMC/PDCP

- **Protocols are stable**
- **Correction of DSCH support in MAC (and RRC)**

Cell selection/re-selection

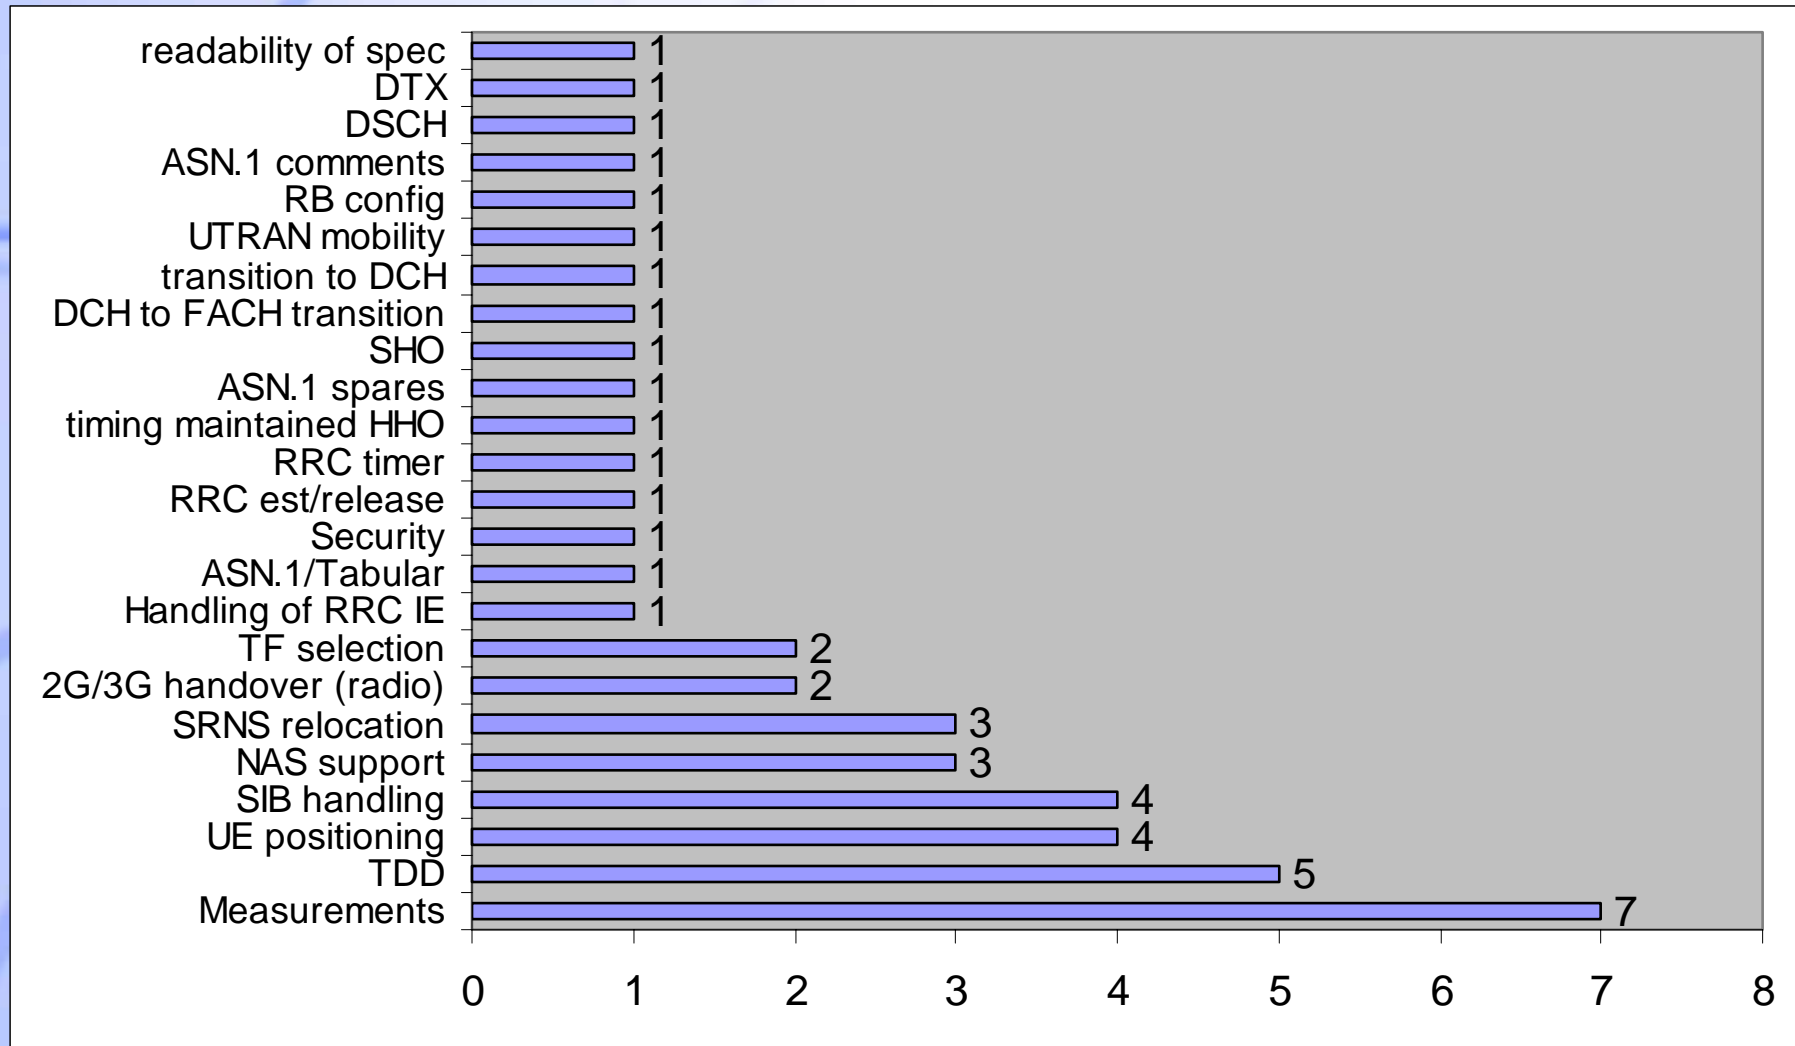

- **Stable**
- **One correction on TDD DRx calculation, one FDD clarification**

RRC

- **Still many needed corrections**
 - Size of the corrections, and impact on actual implementations or interoperability, is decreasing
 - Smaller CRs, but about same amount as last time
 - Many needed clarifications not impacting an educated implementation...
- **Completion of security** 😊
 - Major work accomplished
 - List of open items closed in March 02
 - SA3 accepted some simplifications proposed by RAN2
- **One last UP open item identified**

RRC CRs per function/category

Change Requests on rel 99 specifications

- Refer to RP-02061 for complete list

Release independant frequency bands

- Complete

Release 4 activities

RP-020060

Release 4 CRs

- Some corrections, mainly on LCR-TDD
- Refer to RP-020061 for complete list

Release 5 activities

RP-020060

List of release 5 Work Items under RAN WG2

- Radio access bearer support enhancement
- Improved usage of downlink resource in FDD for CCTrCHs of dedicated type
- High Speed Downlink Packet Access (HSDPA)
- High Speed Downlink Packet Access (HSDPA) - layer 2 and 3 aspects
- UE positioning enhancements
- UE positioning enhancements for 1.28 Mcps TDD
- Open interface between the SMLC and the SRNC within the UTRAN to support A-GPS Positioning
- Open interface between the SMLC and the SRNC within the UTRAN to support Rel-4 positioning methods
- Terminal power saving
- Enhancement of Broadcast and Introduction of Multicast Capabilities in RAN

Radio access bearer support enhancement

- **Proposal for enhancement of IP header compression in case of SRNS relocation was made**
 - Current R4 functionality has some issues that need to be addressed
 - Not completed by lack of time
- **Proposed to be completed in June 02**

Improved usage of downlink resource in FDD for CCTrCHs of dedicated type

- **Release 6 WI**
 - No activity

High Speed Downlink Packet Access

- **Completed according to Work Plan!!**
 - Stage 2 complete
 - One CR on 25.308 capturing the overall progress
 - Change Requests to core specifications have been completed in RAN1, RAN2 and RAN3
 - All WG delegates should be thanked for this great achievement

UE Positioning (UP) enhancements

- No work on new positioning methods as per RAN request

UE positioning enhancements for 1.28 Mcps TDD

- Completed

Open SMLC-SRNC Interface within the UTRAN to support A-GPS Positioning

- No activity. WI is finished.

Open interface between the SMLC and the SRNC within the UTRAN to support Rel-4 positioning methods

- **Some discussions**
- **TR proposal (TR 25.861) was made.**
 - Proposal is to proceed with the writing of the Stage 3 in Release 6, and discontinue the TR.

Terminal Power Saving

- No activity

Enhancement of Broadcast and Introduction of Multicast Capabilities in RAN

- **Some study and many questions**
- **It was mentioned that it may be split in two WIs, one for Broadcast, one for Multicast.**
 - No decision. It will be considered when RAN WG2 has a better understanding of MBMS
- **Joint meeting with SA2 to be organised**
- **Plananned joint session with RAN3 in April 02**
- **WI should be shifted to R6**

Small Technical Enhancements and Improvements for Rel-5

- **Three proposals**

- NACC for 3G to 2G handover
 - A proposal was made to support the radio interface only in release 5, for CELL_DCH state only. No decision yet. Request from RAN to continue work on it until June 02 as a Release 5 candidate.
- Provision of timing information from the UE to the SMLC for improvement of A-GPS assistance data
 - No time.

Feasibility Study under RAN WG2

- None

Release 5 Items under other WGs

- All completed as requested by responsible WG

Conclusions

Chairman's concluding remarks

- R99
 - Greatest achievement was the completion of security. Several companies have spent several man/weeks each to finalise it!!
 - R99 took less of RAN WG2 meeting time but still 75% of last meeting. Now that security is complete, there remains only one open item on UP and the release is complete. We can also notice a clear decline on importance of CRs
 - More corrections will take place after March 02, but will be more and more on minor functionalities and with isolated impacts.
 - Next task is to assist T1 (based on March 02?)
- R5
 - HSDPA has been completed. Good synergy with other groups
 - Some small R5 work items requested to be progressed until June 02
 - WI under other groups finalised

Past work has been paying off
release 99 quality improves, and stability is increasing.

Please sustain efforts and keep experts active in RAN WG2
