Progress Report since the last TSG (for all involved WGs):

At RAN3#38, several contributions have been discussed and analysis material has been added to the TR on architecture issues, possible signalling scheme solutions, handling of trace-related parameters, as well as possible enhancement for the SRNS Relocation case. Two additional contributions were handled at RAN3#39 which lead to no addition to the TR but a Liaison Statement to SA5.

List of Completed elements (for complex work items):

•

List of open issues:

 Mobility via lur: Providing a trigger event to SRNC in case the UE enters a certain DRNC area needs to be discussed with SA5 via LS.

Note: Provided that this solution is feasible.

Estimates of the level of completion (when possible): 35%

WI completion date review resulting from the discussion at RAN WG3: RAN #23
