

Status Report for SI to TSG

Study Item Name: FS on UTRA WideBand Distribution Systems

SOURCE: 3GPP Support

TSG: RAN

WG: 4

E-mail address rapporteur: carlo.matarasso@andrew.com

Ref. to WI sheet: RAN_Study_Items

Progress Report since the last TSG (for all involved WGs):

No progress.

No contributions in the last 6 months. Companies in WG4 are no longer interested in the work in this area. Hence, due to the lack of commitment, RAN WG4 agreed to propose the closing of the Study.

List of Completed elements (for complex work items):

Though it can't be considered complete, the last version of TR 25.867 available contains sections on the following topics:

- Definition & Architecture of Wideband Distribution System
- Impact on Operation & Maintenance
- Impact on Location Services
- WDS Max Output Power issues
- Simulation scenarios

List of open issues:

Estimates of the level of completion (when possible): 60%

WI completion date review resulting from the discussion at the working group:

To be closed at RAN #24
