

TSG-RAN Meeting #27
Tokyo, Japan, 09-11 March 2005

RP-050068
Agenda item 8.3.5

Source: TSG-RAN WG2

Title: CRs to 25.322 on the removal of the EPC mechanism

Spec	CR	Rev	Phase	Subject	Cat	Version-Current	Version-New	Doc-2nd-Level	Workitem
25.322	269	-	Rel-5	Removal of EPC mechanism	F	5.9.0	5.10.0	R2-050614	TEI5
25.322	270	-	Rel-6	Removal of EPC mechanism	A	6.2.0	6.3.0	R2-050615	TEI5

CR-Form-v7.1

CHANGE REQUEST

25.322 CR 269 # rev - # Current version: 5.9.0

For **HELP** on using this form, see bottom of this page or look at the pop-up text over the # symbols.

Proposed change affects: UICC apps ME Radio Access Network Core Network

Title:	# Removal of EPC mechanism		
Source:	# RAN WG2		
Work item code:	# TEI5	Date:	# 14/02/2005
Category:	# F	Release:	# Rel-5
	Use <u>one</u> of the following categories: F (correction) A (corresponds to a correction in an earlier release) B (addition of feature), C (functional modification of feature) D (editorial modification) Detailed explanations of the above categories can be found in 3GPP TR 21.900 .		Use <u>one</u> of the following releases: Ph2 (GSM Phase 2) R96 (Release 1996) R97 (Release 1997) R98 (Release 1998) R99 (Release 1999) Rel-4 (Release 4) Rel-5 (Release 5) Rel-6 (Release 6) Rel-7 (Release 7)

Reason for change:	# EPC mechanism is removed from the specification, by CR242 at RAN #21. In section 11.5.2, there is still a reference to EPC mechanism.
Summary of change:	# Clause that mentions EPC mechanism is removed from the specification.
Consequences if not approved:	# Specification refers to a mechanism that does not exist. Isolated Impact analysis: - There is no backward compatibility issues for R99 and Rel-4 UEs. - There is no impact on T1.

Clauses affected:	# 11.5.2								
Other specs affected:	<table style="display: inline-table; border-collapse: collapse;"> <tr> <td style="border: 1px solid black; padding: 2px;">Y</td> <td style="border: 1px solid black; padding: 2px;">N</td> </tr> <tr> <td style="border: 1px solid black; padding: 2px;">#</td> <td style="border: 1px solid black; padding: 2px;">X</td> </tr> </table> Other core specifications # <table style="display: inline-table; border-collapse: collapse;"> <tr> <td style="border: 1px solid black; padding: 2px;">#</td> <td style="border: 1px solid black; padding: 2px;">X</td> </tr> </table> Test specifications # <table style="display: inline-table; border-collapse: collapse;"> <tr> <td style="border: 1px solid black; padding: 2px;">#</td> <td style="border: 1px solid black; padding: 2px;">X</td> </tr> </table> O&M Specifications #	Y	N	#	X	#	X	#	X

#	X								
Other comments:	#								

How to create CRs using this form:

Comprehensive information and tips about how to create CRs can be found at <http://www.3gpp.org/specs/CR.htm>. Below is a brief summary:

- 1) Fill out the above form. The symbols above marked # contain pop-up help information about the field that they are closest to.

- 2) Obtain the latest version for the release of the specification to which the change is proposed. Use the MS Word "revision marks" feature (also known as "track changes") when making the changes. All 3GPP specifications can be downloaded from the 3GPP server under <ftp://ftp.3gpp.org/specs/> For the latest version, look for the directory name with the latest date e.g. 2001-03 contains the specifications resulting from the March 2001 TSG meetings.
- 3) With "track changes" disabled, paste the entire CR form (use CTRL-A to select it) into the specification just in front of the clause containing the first piece of changed text. Delete those parts of the specification which are not relevant to the change request.

11.5.2 Initiation

The Receiver shall:

- if one of the following triggers is detected:
 - 1) The "Polling bit" in a received AMD PDU is set to "1";
 - 2) "Missing PDU Indicator" is configured and a missing AMD PDU is detected;
 - 3) The "Timer based STATUS transfer" is configured and the timer Timer_Status_Periodic has expired:
 - act on the trigger as specified in subclause 9.7.2.
 - 4) An indicator received from MAC requesting generation of a status report following MAC-hs reset:
- generate a status report, even if the STATUS prohibit ~~or the EPC mechanism~~ is configured to prohibit the Receiver from sending a status report containing any of the SUFIs LIST, BITMAP, RLIST or ACK as specified in subclause 9.7.2.
