Re: RP-151624: New Work Item proposal: Indoor Positioning enhancements for UTRA and LTE

Dear Mr. Saynajakangas,

SBA Communications Corporation is a first choice provider and leading owner and operator of wireless communications infrastructure in North, Central and South America.

Currently, we own and operate over 24,000 towers across North, Central and South America. We build our towers at the request of wireless carriers, leveraging our in-house experience in site acquisition, zoning and construction. SBA manages approximately 5,000 communication site locations on behalf of third-party landlords and we also provide infrastructure solutions to a wide variety of wireless service providers.

Since 2011, NextNav has been a tenant on multiple SBA sites across the United States. Our towers are designed to accommodate multiple users. NextNav has collocated on a variety of our sites with other tenants those of which include some combination of wireless operators such as AT&T, Verizon, T Mobile and Sprint. To date we can attest that SBA has not received a single interference complaint relating to the NextNav MBS transmissions from any of the wireless operators collocated on the same towers with NextNav or those located near our towers.

Should you have any questions, please do not hesitate to contact me.

Respectfully yours,

Edward G. Roach

Vice President and Associate General Counsel
