

TU request and work plan for new SI study on UL data compression in LTE

CATT

TU request

- UDC SID is stable and 27 companies support the study item.
- Considering RAN2 TU limitation and ensure there is enough time for simulation and evaluation, the online TU requested by UDC can be updated as below:

95bis	96	97	97bis	98
0.25	0	0.5	1	1

meeting	Work plan
95bis	Work plan and skeleton TR, trigger email discussion for simulation purpose. Aim to have common service data for simulation.
96	No online TU requested. Simulation is done by using the common service data.
97	Companies can provide simulation results via email before the meeting. Some initial discussion on the simulation result and start the email discussion on comparison.
97bis	Down selection and discuss the signaling procedure and data format etc.
98	Complete TR.
