# Defining a “human” Rel-18 RAN package. Deutsche Telekom AG

3GPP RAN#94e | Dec. 6<sup>th</sup> – 16<sup>th</sup> 2021

# Overall mindset to guide us.

---

**Prioritize enhancements originating from actual deployment learnings**

**Prioritize topics of immediate commercial relevance**

**Prioritize topics which enhance the 3GPP systems with respect to “human centricity” and sustainability**

---

**Leave aside highly complex solutions with marginal gains; which will not be commercialized anyway**

**Do not enable “half-way” features by stripped down WI objectives, drop complete topics instead**

---

**Balance the workload !**

**We as RAN have the responsibility to deliver high quality standards, while keeping a safe and healthy working environment for our RAN WG delegates**

- Immense dedication has been given already during the 24 months of pandemic resulting in endless electronic meetings in 3GPP
- Minimize the WG workload significantly for Rel-18 compared to what we have today

---

**Let's continue to advance 5G for the sake of enhancing human life & sustainability.**

# Our RAN Rel-18 package – the rest we drop.

**T** Priority topic for Deutsche Telekom

3GPP RAN#94e | Dec. 6th – 16th 2021 | RP-213236

End-2-End topics (RAN - SA):  
RAN TU reservation topics from SA is also needed

**Final remark – as a reminder.**

**Rel-18 should be a fixed 18 months release !**

**-> Let's honestly identify content for 18 months  
and do a proper job for workload management.**

# FEEL CONNECTED ALL OVER EUROPE.

**THE WORLD**
