

Recommendations on Merging Process for 3GPP TSG RAN WG1 specification document:

**S1.23
TDD Spreading and Modulation**

Source: Siemens

1 Scope

In this contribution we try to summarise the detailed recommendations for the merging process of ARIB and ETSI standardisation text in the S1.23 document: TDD Spreading and Modulation.

2 Recommendations

Recommendations are listed by chapters. If a chapter is not listed, content should be kept.

Intellectual Property Rights

General 3GPP Rules should apply.

1 Scope

General 3GPP Rules should apply.

4 General

Include ARIB text.

5 Data Modulation

Remove section 3.3.4.1 'Data Modulation' and the included sentence 'The modulation is QPSK with time multiplexed DPDCH and DPCCH in reverse link and forward link'.

6 Spreading Modulation

Take ETSI text. Section 3.3.4.2.2.3 from ARIB is already covered in S1.21.
