Text proposal for STTD encoding of PCCPCH

Texas Instruments

April 15, 1999

We propose the following text from [1] should be added to S1.11 to further clarify the STTD encoding of PCCPCH in S1.11 document.

[1] Texas Instruments, "An alternative scheme to detect the STTD encoding of PCCPCH", Tdoc 150/99, WG1 # 3, Nyanashamn, Sweden, March 1999. ------Being additional text for S1.11 section 5.3.3.1.1------

The STTD encoding for the data symbols of the slots 1 and 2 of a PCCPCH frame is given in the figure below. The same procedure is used for the data symbols of slots 3 and 4, 5 and 6 and henceforth, respectively.

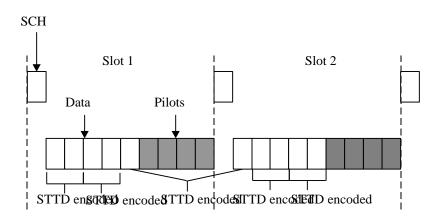

Figure: STTD encoding for the data symbols of the PCCPCH is shown.

-----End additional text for \$1.11 section 5.3.3.1.1-----
