Title: CR for RRC functions (25.301)

Document for: Discussion and decision

_____

Abstract
   This contribution proposes to add requirements for RRC connection re-establishment between a UE and UTRAN.

Proposal
   Following description should be added in TS 25.301, Radio Interface Protocol Archtecture.

5.4.2 RRC functions

   .
   .
   .

- [**Re-establishment of an RRC connection between the UE and UTRAN.** The re-establishment of an RRC connection is initiated by the UE side in case of a connection loss in CELL_DCH state. [How the UE detects the connection loss is ffs.] The re-establishment of an RRC connection may be initiated only when the UE requires a re-establishment. When the re-establishment is failed and if the connection is allowed in CELL_FACH state, RRC connection will be re-established in CELL_FACH state.
