Title: Modification of Message Names for Dedicated Measurements in RNSAP and NBAP

Document for: Decision

1 Introduction

This contribution proposes a modification of some message names for messages within the DCH Procedures module RNSAP and the Dedicated Procedures in NBAP.

2 Discussion

When the measurement procedures for dedicated resources were introduced at the RAN WG3 meeting #5 in Helsinki the proposed message names were considered not different enough from the messages for measurements on common resources that existed in the NBAP specification. The meeting thus agreed on a modification of the names to be “DEDICATED MEASUREMENT xxx”

However, most messages in the DCH procedures module in RNSAP and in the Dedicated Procedures has names of the type “RADIO LINK xxx”. It is therefore proposed to rename the messages for the measurements on dedicated resources to “RADIO LINK MEASUREMENT xxx”. The new message names would thus be:

Present message name	Proposed message name
DEDICATED MEASUREMENT INITIATION REQUEST	<i>RADIO LINK</i> MEASUREMENT INITIATION REQUEST
DEDICATED MEASUREMENT INITIATION RESPONSE	<i>RADIO LINK</i> MEASUREMENT INITIATION RESPONSE
DEDICATED MEASUREMENT INITIATION FAILURE	<i>RADIO LINK</i> MEASUREMENT INITIATION FAILURE
DEDICATED MEASUREMENT REPORT	<i>RADIO LINK</i> MEASUREMENT REPORT
DEDICATED MEASUREMENT TERMINATION REQUEST	<i>RADIO LINK</i> MEASUREMENT TERMINATION REQUEST
DEDICATED MEASUREMENT FAILURE INDICATION ¹	<i>RADIO LINK</i> MEASUREMENT FAILURE INDICATION

¹ This present name does not contain the suffix “indication”. The suffix is part of the proposal in reference 3.

3 Proposal

It is proposed to:

- a) Modify the message names in the DCH Procedures module of RNSAP according to chapter 2 above.
- b) Modify the message names in of the Dedicated Procedures of NBAP according to chapter 2 above.
