Agenda Item:

TSG-RAN Working Group 1 (Radio) meeting #4
Yokohama, Japan, 19 – 20 April 1999

TSGR1#4(99)525

Source: TSG RAN WG1

Title: Liaison statement to WG2 on FACH rates

To: TSG RAN WG2

cc: TSG RAN

During its fourth meeting, 3GPP RAN WG1 discussed the physical layer structure of the downlink common physical channel (i.e. Secondary CCPCH), and it appeared that WG1 needs comments from WG2.

In WG1, there is an opinion that the lowest spreading factor should be 64 (or 32) for low-cost terminals, and multiple Secondary CCPCHs should be used if higher rates are needed. WG1 would like to hear comments on what the highest bit rate WG2 think to carry by FACH.
