

**TSG-RAN meeting #6**  
**Nice, France, 13-15 December 1999**

**TSG-RAN RP99722**

**Title: Liaison statement to SA2 and TSG\_RAN on DelayFigures.**

**Source: TSG-SA WG4 Codec**

**Document for: Approval**

SA4 are working on a technical specification, TS26.915, on a transmission plan for third generation speech and multi-media services. This document specifies the delay budget for these services across the 3G system, as well as the type and location of echo cancellation equipment. A similar document, ETS300-540 (03.50) exists for GSM.

To enable SA4 to complete this work item, SA4 kindly request SA2 and TSG\_RAN to supply the delay figures for the UTRAN, including the UE and Terminal for the bearers envisaged for use with the AMR speech service and the H.324 circuit switched multi-media service. SA4 kindly asks TSG\_RAN to direct this request to the appropriate RAN working group. SA4 believes it can complete this work within Release'99 but requires the information by its' January 2000 meeting (24<sup>th</sup>-28<sup>th</sup> January 2000) if at all possible.
