Object: R99 Cover Sheet: Compressed mode with puncturing (FDD only)

The following item is proposed to be still included in Release -99.

Release 1999 Submission form

Work Area / Item:		Compressed mode with puncturing (Method A)			
Affects:	UE/MS: X	CN:	UTRAN: X	Compatibility Issues:	Yes:X No:
Expected Completion Date:		3/2000			
Services impacted:		Baseline capability			
Specifications affected:		25.212			
Tasks within work which are not complete:			The details with several transmission time intervals need to be clarified		
Consequences if not included in Release 1999:			Would result to different base line capability for Release -99 and release 2000 terminals with respect how they are provided the compressed frames for interfrequency/intersystem measurements. Potential performance problems have been brought up with having only the spreading factor halving method in release -99.		
Accepted by TSG#		for late inclusion in Release 1999:
