2 March 2000.

## Executive summary

During TSG-RAN #10, a total of 200 documents were handled. All CRs with one exception brought in by the WGs were approved (although some needed revision during the meeting). The exception was one CR that was rejected. The only postponed CR of TSG-RAN #9 was withdrawn in TSG-RAN #10.

There was a reminder to all delegates on the obligation of the member companies to declare essential IPRs.

Following some difficulties with the preparation of the plenary, the WGs were requested to finalise the WGs' results in reasonable time before future plenaries. The WGs were also requested to pay more attention to the proper preparation of Release 4 (and later) issues, in particular version numbers and cover sheets for TRs and TSs and the rapporteurs' reports on the WIs.

A discussion on vocabulary was deferred to TSG-SA and TSG-RAN WG4.

Several output documents to ITU-R were discussed and approved on the following topics: Submission of future updates of WCDMA; and Comments on the update procedure for revisions of Recommendation ITU-R M.1457.

One new work item (Intra-Domain Connection of RAN nodes to multiple CN Nodes) was conditionally agreed. On a proposed WI on OAM feedback was needed. The existing Rel-4 WI and SI sheets were rediscussed and re-endorsed. The WI Improved usage of downlink resource in FDD for CCTrCHs of dedicated type was moved to Rel-5. The WIs Requirement on Equipment and Smart Antenna were deleted. New or revised WI sheets were provided for TrFO, UE Positioning. The WI sheets for Radio Interface Improvement Feature, RAN Improvement Feature and RAN Technical Small Enhancements and Improvements need to be revised after the meeting.

An overview of all WIs that TSG-RAN endorsed to be part of Rel-4 was submitted to TSG-SA.

A workshop on IP UTRAN evolution was agreed to be held in February.

## 1 Opening of the meeting

Yukitsuna Furuya (Chairman) opened the meeting, the 2nd anniversary of the TSG plenaries and thanked the host, Unisys for the organisation. Gerfried Handtke (Unisys) welcomed the delegates to Bangkok and explained the logistics and organisation of the meeting.

Yukitsuna Furuya (Chairman) also reminded the delegates of their obligations under the IPR policy.

---

## 2 Approval of the agenda

### **RP-000520 Proposed agenda (Chairman)**

Yukitsuna Furuya (Chairman) proposed the agenda for the meeting.

**Decision:** The agenda was approved.

### 3 Approval of the meeting report of TSG-RAN Meeting #9

**RP-000521** Draft Report of the 9th TSG-RAN meeting (Oahu, HI, USA, 20-22 September 2000)  
(Secretary)

**RP-000522** Revised draft Report of the 9th TSG-RAN meeting (Oahu, HI, USA, 20-22 September 2000)  
(Secretary)

The revised meeting report of TSG-RAN #9 in RP-000522 had been distributed via the email reflector and was on the server. Compared to the original draft version, there was only a small correction on the planned dates for one of the Work Items. The meeting calendar would be updated in the approved version.

**Decision:** The report was approved. The approved report would be available in RP-000523.

**RP-000523** Approved Report of the 9th TSG-RAN meeting (Oahu, HI, USA, 20-22 September 2000)  
(Secretary)

This was the approved report of the TSG-RAN #9 meeting.

### 4 Inputs from other groups

#### 4.1 TSG-SA, TSG-T, TSG-CN, TSG-GERAN

##### 4.1.1 TSG-SA and TSG-SA WGs

**RP-000667** (S1-000847, to TSG-RAN) LS on Invitation to send contributions to TR 21.905 (3GPP Vocabulary) (TSG-SA WG1)

Hans van der Veen (Secretary) presented this LS.

**Discussion:** The vocabulary document depended on input from all TSGs and WGs; TSG-SA WG1 reminded TSG-RAN of this and requested input.

**Decision:** The LS was noted.

##### 4.1.2 TSG-T and TSG-T WGs

**RP-000527** (TP-000175, to TSG-RAN) LS on Transfer of EMC documents 34.124 and 34.926 (TSG-T)

Howard Benn (TSG-RAN WG4 Chairman) presented this LS.

**Discussion:** Due to the limited number of experts on EMC, TSG-T WG1 and TSG-RAN WG4 had discussed the transfer of EMC documents.

**Decision:** The LS was noted. The transfer to WG4 was accepted.

**RP-000534** (T1-000265, copy TSG-RAN) LS on TR 21.905: Vocabulary for 3GPP Specifications (TSG-T WG1)

Yukitsuna Furuya (Chairman) presented this LS.

**Discussion:** There was considerable concern on the definitions provided. Also, it appeared that the handling of this in TSG-SA seemed to be 'dead'. Most definitions seem (at a glance) to be correct (according to the TSG-RAN WG4 Chairman).

**Decision:** The LS was noted. TSG-RAN tasked TSG-RAN WG4 to respond directly to TSG-T WG1. On the handling of the vocabulary document, TSG-RAN tasked TSG-RAN WG4 to consider the handling of the document and come back with a proposal for the next TSG-RAN plenary.

**RP-000535(T1-000266, copy TSG-RAN) LS on Urgency of resolving the measurement uncertainty in 34.121 (TSG-T WG1)**

Howard Benn (TSG-RAN WG4 Chairman) presented this LS.

**Discussion:** The document was for information to TSG-RAN. TSG-RAN WG4 was aware of the issue and it was covered in documents to be handled later. The information would be important for MSG/TFES and ARIB. Approval of the relevant CRs in WG4 by correspondence was logistically problematic. Eisuke Fukuda (ARIB) stated that approval at TSG-RAN plenary #11 (March, Palm Springs) was no problem for ARIB. For ETSI, MSG would approve the values in February. There was a need to make sure that the values for ARIB and ETSI were consistent. The regulatory issue in Japan was clarified, and especially its impact on WG4.

**Decision:** The LS was noted. WG4 was requested to finalise this issue by the TSG-RAN #11 plenary in March.

#### 4.1.3 TSG-CN and TSG-CN WGs

**RP-000525(NP-000548, to TSG-RAN) LS on CR categories (TSG-CN)**

This document was for information, as the CR had been approved in TSG-SA #9 already.

**RP-000526(NP-000554, to TSG-RAN) LS on Categories for frozen releases (TSG-CN)**

This document was for information, as the CR had been approved in TSG-SA #9 already.

**RP-000710LS (NP-000728, to TSG-RAN) on R99 Lossless Relocation for UMTS (TSG-CN)**

Hans van der Veen (TSG-RAN Secretary) presented this LS.

**Discussion:** WG3 was aware of the issue.

**Decision:** The LS was noted. The working assumption should be provided to WG3.

#### 4.1.4 TSG-GERAN and TSG-GERAN WGs

There were no LSs from these groups.

## 4.2 Others (non-RAN)

### 4.2.1 OP and PCG

Yukitsuna Furuya (Chairman) reported on the latest meeting of PCG and OP. PCG had agreed that PCG will invite some ITU delegates to PCG and OP meetings. There had also been discussions with IETF. Next year chairmanship of the PCG will be taken over by Akio Sasaki (ARIB), with Karl-Heinz Rosenbrock (ETSI) and Asok Chatterjee (T1) as vice-chairmen.

### 4.2.2 ITU-T

**RP-000533LS (ITU-T) on Interpretation of Link characteristics parameter (ITU-T)**

Hiroshi Komatsu (Japan Telecom) presented this LS.

**Discussion:** This document should be handled in WG3.

**Decision:** The LS was noted. The LS would be forwarded to TSG-RAN WG3 for consideration.

#### 4.2.4 Others

##### **RP-000668 Japanese regulatory items in TS 25.141 and TS 34.121 (ARIB)**

Eisuke Fukuda (ARIB) presented this LS.

**Discussion:** This was a response and clarification on RP-000535 (T1-000266, LS from TSG-T WG1 on this issue). It seemed that the timing aspect was OK for both ARIB and ETSI. The harmonisation of the figures was an issue that was ongoing.

**Decision:** The LS was noted.

#### 4.3 TSG-RAN WGs

##### 4.3.1 TSG-RAN WG1

There were no incoming LSs from this WG.

##### 4.3.2 TSG-RAN WG2

There were no incoming LSs from this WG.

##### 4.3.3 TSG-RAN WG3

There were no incoming LSs from this WG.

##### 4.3.4 TSG-RAN WG4

##### **RP-000524(R4-000998, to TSG-RAN) Response to LS (R1-001321) on 1.28 Mcps TDD and 3.84 Mcps TDD co-existence studies in RAN4 (TSG-RAN WG4)**

Howard Benn (TSG-RAN WG4 Chairman) presented this LS.

**Discussion:** This issue would be handled in the report from TSG-RAN WG4.

**Decision:** The LS was noted.

## 5 Status Report and Approval of contributions - Release '99

### IMPORTANT

**Hans van der Veen (Secretary) noted that in particular a part of the results of the TSG-RAN WGs and also the reports of the WG chairmen had been made available extremely late for this TSG-RAN plenary. The first WG report had not been provided until the day before the meeting, the rest only on the first meeting day itself. Some WGs had allowed e-mail approval of CRs until a few hours before the start of the meeting. This WG behaviour had made it very difficult for the MCC support staff to do a proper preparation of the results for the plenary. Other delegations also expressed concern on this fact.**

**Therefore Hans van der Veen (Secretary) and Yukitsuna Furuya (Chairman) requested the WGs and WG chairmen to make sure that for future TSG-RAN plenaries the WGs' results (especially CRs, TRs**

and TSs) were finalised a reasonable time before the plenary, in order to allow MCC to do the proper preparation, and certainly not as late as in the week of the plenary itself.

#### RP-000682 Handling of R'99 CRs (Nokia)

Antti Toskala (Nokia) presented this document.

**Discussion:** The second page was irrelevant as it had already been taken into account in an agreed CR by TSG-SA during TSG-SA #9. The principles were agreeable, but there were a number of comments. The fourth (last) bullet point was a bit vague. Also, the size of a CR was not the only reason to provide more time to review a CR. With regard to the first bullet point, it was pointed out that consensus was desirable, but should not be mandatory. However, it was in the 3GPP rules that consensus was the de facto rule.

**Decision:** The document was noted. The relevant principles that were endorsed were made available in Annex D.

## 5.1 TSG-RAN WG1

### 5.1.1 Report from TSG-RAN WG1

#### RP-000536 Report from WG1 chairman to TSG-RAN (TSG-RAN WG1 Chairman)

#### RP-000550 Supplement (List of agreed CRs) to Report from WG1 chairman to TSG-RAN (TSG-RAN WG1 Chairman)

Antti Toskala (Chairman TSG-RAN WG1) presented this report (RP-000550) and the supplement of agreed CRs (RP-000551).

**Presentation:**

Release '99:

- Issues need typically less than 1 day out of 4 days in the meetings

Release 4 and 5:

- Highest number of papers for High Speed Downlink Packet Access (HSDPA)
- For the following work items input provided to TSG RAN for Release 4 (TR)
  - DPCCH gating (as part of Terminal power saving features)
  - TDD Node B synchronisation
  - DSCH power control improvement in SHO
- For 1.28 Mcps TDD no specific input, work on-going on working CRs

**Discussion:**

- On hard-coded preconfigurations (originating from WG2), WG1 would do a review where appropriate.
- Since the amount of work was well down from its peak, there was a request to reduce the number of meetings. In response, it was pointed out that the duration of the meetings could be shorter, but that there was still a need for the number of meetings, although some could be Ad Hocs on specific topics.

**Decision:** The report was noted.

## 5.2 TSG-RAN WG2

### 5.2.1 Report from TSG-RAN WG2

**RP-000561 Report from WG2 chairman to TSG-RAN (TSG-RAN WG2 Chairman)**

**RP-000562 Supplement (List of agreed CRs) to Report from WG2 chairman to TSG-RAN (TSG-RAN WG2 Chairman)**

Denis Fauconnier (Chairman TSG-RAN WG2) presented this report (RP-000561) by telephone. Hans van der Veen (Secretary TSG-RAN WG2) presented the supplement of agreed CRs (RP-000562). Additionally, the status reports of the Work Items and Study Items for which TSG-RAN WG2 is the leading WG can be found in RP-000554 (see agenda item 6).

**Presentation:**

- Highlights Release '99 (CR list in RP-000562):
  - A lot of extra Ad Hoc meetings on RRC had been held (RRC experts had in total attended 7 meetings in the past 6 months).
  - Many meetings, many working hours, but December 2000 is an essential milestone for R'99.
  - 6 months action on RRC successfully completed (at the expense to hard work!) for TSG-RAN #10
  - Finalisation of outstanding RLC decisions (performance, timers, RLC reset)
  - Conclusions on all points treated in joint meetings with WG4:
    - Measurements in CELL\_FACH state
    - Measurement report in RACH messages
    - PLMN selection:
      - It was identified that issue spans many groups, and a Workshop may be required.
    - Cell reselection performance provided by RAN WG4 => Immediate Cell Evaluation was deleted
    - Documentation for RRC performance specifications:
      - Layer 1 related procedures in WG4 specifications
      - Non Layer 1 related procedures in 25.331
  - CR 520, that had been postponed at TSG-RAN #9 was withdrawn.
  - Measurements signalling may be simplified
    - As per discussions in joint WG2/WG4
  - Optimisation of signalling for compressed mode
    - As per request from WG4
  - SRNS relocation vs. security
    - E-mail discussion ongoing, some remaining difficulties
  - Activation time
    - May not be a problem finally
  - Hard coded pre-configurations
    - Request from operators. Principles were agreed, signalling and selection of parameters need to be finalised, in line with other WGs.
  - PLMN selection and re-selection
    - Workshop?
- Release 2000 (details in RP-000554, agenda item 6):
  - Some Rel-4 progress, but little available time so far

- Little time allowed in main meeting due to heavy workload on release 99, both for WI under WG2 or under WG1 (essentially Power Saving feature)
- More time expected from January, but schedule is extremely tight!
- Both Low Chip Rate TRs are stable and presented for approval to RAN Plenary in v2.0.0. CRs should be written for March 2001
- Concluding remarks:
  - RRC: Progress has been decisive. Action started 6 months ago on RRC reached a very essential milestone for RRC Dec 00.
  - RLC: Probably last key decisions were taken, now completion is close.
  - Other protocols are stable.
  - Standard quality needs to be improved, but has already made significant progress.
  - The Chairman wanted to thank all companies for the hard work accomplished, in particular RRC experts, and for the excellent team spirit which has allowed to close this 6 months efforts successfully. Chairman was proud of results achieved by RAN WG2 experts. Please sustain efforts and keep experts active in RAN WG2

**Discussion:**

- The need to have the information in TR 25.926 normative had been identified a few months ago. Since a TR is not normative by definition, there were two solutions: move everything to RRC, or make the TR a TS. It was felt that RRC was big enough, so the preferred solution was to make the TR a TS instead. There would only be one place to collect the UE capabilities, namely (TS 25.306), although there will be both a R'99 and Rel-4 version of that document. TR 25.834 is a temporary document, not for publication, to capture agreements until the time when CRs can be written to 25.306.
- With respect to the UE positioning topics, the first one (OTDOA-IPDL for TDD) would probably be finished in March 2001. The other two were under discussion.
- Work on hard-coded preconfigurations should be finished by March. WG2 is going to do the RLC parameters (essentially) and expects WG1 to do the parameters relevant to layer 1. The selected RABs are the basis for work in WG1; new ones would be introduced only if necessary. The available RABs are quite complete (34.108). The new version of 34.108 (after this week) would be used for further review in WG1.
- Hybrid ARQ will be part of the discussion on HSDPA in the Ad Hoc in January.

**Decision:** The report was noted. A workshop on PLMN was felt to be useful, and would be highlighted to TSG-SA. The WG1 and WG2 chairmen were requested to have a joint Ad Hoc on HSDPA before the March plenary in Palm Springs.

**5.2.2 Discussions on decisions from TSG-RAN WG2**

**RP-000669 "Proposed CR 597r4 to 25.331 on RRC Connection Management Procedures, Generic procedures and actions" (Nokia)**

This document was replaced by RP-000715, which has the same contents as revision 3, but with a revised cover sheet, see agenda item 5.2.3 on 25.331.

**5.2.3 Approval of contributions from TSG-RAN WG2**

1) Except CR 597r3. An Ad Hoc meeting was held to resolve differences. Nokia asked for the following summary to be minuted: "In the offline discussion, the reasons for different views had been clarified and it became obvious that one of the reasons had been inconsistency in the TS 25.331. Reading different parts of the specification gives different conclusions on the need for correction. The correction in revision 3 was also discussed and it was concluded that the correction could have been done with fewer functional impacts. Based on the offline discussions revision 3 was agreed once the reasons for different views were finally understood by the participants of the discussion."

It was decided that no changes were needed to the actual contents of the CR. The CR with the revised cover sheet was provided as CR 597r5, which was approved.

2) The CR had been circulated on the WG2 mail reflector without comments. Alcatel mentioned that introduction of new scenarios had been discussed in the joint WG2/WG4 meeting and supported by

some operators, but the WG4 Chairman stated that there had been no agreement on this issue. The CR was approved.

## 5.3 TSG-RAN WG3

### 5.3.1 Report from TSG-RAN WG3

**RP-000606 Report from WG3 chairman to TSG-RAN (TSG-RAN WG3 Chairman)**

Carolyn Taylor (Secretary TSG-RAN WG3) presented this report.

**Presentation:**

- Since the last TSG RAN, WG3 had focused on corrections for R'99;
- All R'99 open issues presented at RAN#9 had been solved. Besides these, there had been even more contributions to solve other issues. However, still some consistency checking and improvement had been identified as needed, mainly on RNSAP and NBAP specifications to improve their quality;
- RAN WG3 had been mainly focusing on R'99 issues, thus giving quite little time for progressing the R00 aspects. However, two 3 days ad hocs on IP transport in UTRAN work item were held which allowed some progress;
- While solving the open issue of references to WG4 specifications, WG3 pointed out the following issue: Non dated references to TS or TR shall refer to the latest version of the TS or TR but consistently within one release.

**Discussion:**

- There was a discussion on version handling. On the basis of an update to RP-000532, the issue would be handled in TSG-SA.

**Decision:** The report was noted.

RP-000610	25.411	3.2.0	Agreed CRs	CR 002 approved; CR 003 rejected 1)	3.3.0

- 1) CR 003r1 tried to introduce optionality for Iu, Iur and Iub to support fractional ATM. There were objections for the Iur and Iub case, where this should be mandatory. This needed to be checked by Carolyn. The outcome of the check was that WG3 had no problem in having TSG-RAN reject the CR and having WG3 revisit the issue. CR 003r1 was rejected.

1) Absolute values might not be exactly the ones needed in the physical layer in practice; in the scope it should be make clear that the figures are not requirements on equipment and were strictly for the sake of example (they could be considered worst-case examples);

There were also some strange dated references, to non-approved versions of a report ([15]) and to 03.05 Release '97 ([13]) (since later versions had actually removed the section that was referred to!);

The document had better be produced as a 3GPP-internal document (25.800-series), to avoid publishing a document that could be (mis)used to prove how 'bad' the situation is (i.e. to avoid bad

publicity). This was the reason why this kind of information had been removed from 03.05 etc. With these warnings and a change to 25.853, it was approved.

## 5.4 TSG-RAN WG4

### 5.4.1 Report from TSG-RAN WG4

#### RP-000584 Report from WG4 chairman to TSG-RAN (TSG-RAN WG4 Chairman)

Howard Benn (Chairman TSG-RAN WG4) presented this report.

##### Presentation:

- Release 99:
  - Good progress had been made since RAN#9;
  - The number and magnitude of corrections to the BTS and UE release 99 specifications were reducing, and yet again significant progress had been made on the RRM documents;
  - More corrections to the RRM documents should be expected at RAN #11.
- Release 4:
  - Work on release 4 (R00) work items was also progressing well;
  - One adhoc on narrowband and wideband TDD interworking was held (see LS RP-000524), and one adhoc on UMTS 1800.
  - Narrowband TDD, BS classifications and FDD repeaters were near completion with the technical reports available. Either new TS's or CR's to release 4 specifications should be expected at RAN#12.

##### Discussion:

- The request that had been done by TSG-RAN to TSG-RAN WG4 to study the interference issues around the different TDD options had been completed, although there were additional requests for more cases to be studied. This would be discussed in the discussion on the Rel-4 Low Chip Rate WI.

**Decision:** The report was noted.

However, it was discovered that the CR numbers of the documents in RP-000589 were wrong, as the same number had been used more than once. - 1) CR 062 was revised by RP-000703. Nortel Networks mentioned that it was rather concerned with the working procedures adopted by TSG-RAN WG4 and expressed its opinion that this should not happen again. The WG4 Chairman agreed on this and supported the comments and would make sure that it would not happen again. CR 062r1 (RP-000703) was approved.

## 5.5 ITU Ad Hoc

**RP-000672 Status Report (ITU-R Ad Hoc contact person)**

Giovanni Romano (CSELT) presented this report.

**Discussion:** The documents were presented on behalf of Nicola Pio Magnani (ITU-R Ad Hoc contact person). ITU-R WP 8F had been unable to reach agreement on the planned Revision 1 of Recommendation ITU-R M.1457 ("Detailed Specifications of the Radio Interfaces of IMT-2000") in respect to the terrestrial radio interfaces. In fact it was not possible to achieve consensus on the definition of 'routine' and 'non-routine' changes. However, no questions nor concerns were raised on the material developed by TSG RAN. A new procedure had been defined on updating the document, see RP-000675.

**Decision:** The report was noted.

**RP-000673 Submission of future updates of WCDMA to ITU-R WP 8F (ITU-R Ad Hoc)**

Giovanni Romano (CSELT) presented this document.

**Discussion:** This document was a technical response following the new procedure laid down by ITU-R. There were several editorial errors, the use of the term W-CDMA needed to be corrected and small comments had been given already, so a new revision would be produced.

**Decision:** The document was noted. The appropriateness of providing the five annexes to ITU-R was confirmed. A revision, based on offline discussion, was provided in RP-000708.

**RP-000708 Submission of future updates of WCDMA to ITU-R WP 8F (ITU-R Ad Hoc)**

Giovanni Romano (CSELT) presented this document.

**Discussion:** There was a request to include the documents containing the approved work items and study items (work item sheets). In response to this, it was clarified that ITU-R WP 8F could not handle too much detail, and that the WI sheets were not really appropriate. There was also concern that no distinction was made between WIs and SIs. In response to this, it was clarified that ITU-R WP 8F is only interested in what work is foreseen, not whether it is a WI or an SI. It was requested to include information on UMTS 1800. It was pointed out that the description of this needed to be very careful.

After offline discussion it was proposed to change the words "significant ..." with "new areas". Editorial error: Annex 6 should be Annex 7.

**Decision:** With the latest two changes, the text of the document was approved. The revision with the approved text of the actual LS would be in RP-000718.

**RP-000718 Submission of future updates of WCDMA to ITU-R WP 8F (ITU-R Ad Hoc)**

**Decision:** The document was approved. It would be left to the ITU-R Ad Hoc group to do necessary changes to the annexes based on the progress in the WGs, which would then be circulated on the TSG-RAN e-mail reflector for approval. The period for approval would be one week.

**RP-000674 Comments on the update procedure for revisions of Recommendation ITU-R M.1457 (ITU-R Ad Hoc)**

Giovanni Romano (CSELT) presented this document.

**Discussion:** This draft response to RP-000675 had been drafted by the ITU-R Ad Hoc group. The tone was felt to be a bit strong, although the principles of the LS were agreed. Giovanni Romano (CSELT) would chair an offline discussion on this issue.

**Decision:** The document was noted. An update was provided in RP-000709.

**RP-000709 Comments on the update procedure for revisions of Recommendation ITU-R M.1457 (ITU-R Ad Hoc)**

Giovanni Romano (CSELT) presented this document.

**Decision:** The document was approved to be sent as LS to ITU-R through the normal procedures.

**RP-000675 Update procedure for revisions of Recommendation ITU-R M.1457 (ITU-R Ad Hoc contact person)**

Giovanni Romano (CSELT) presented this document.

**Discussion:** This document introduced an update of the procedure for Revisions of Recommendation ITU-R M.1457 (Detailed specifications of the radio interfaces of IMT-2000). It introduced a large overhead for TSG-RAN. The ITU Ad Hoc group had drafted an LS to ITU-R with comments (see RP-000674).

**Decision:** The document was noted.

## 6 Release 4 and 5

### IMPORTANT

- 1) It was clarified and brought once more to the WGs' attention that it is every WI's rapporteur's responsibility to collect the information on his/her WI in all Working Groups in all TSGs. The rapporteur's responsibilities were clarified in an annex of the minutes of the TSG-RAN #8 plenary in Düsseldorf. Normally this should be seen by the WG, then presented by the WG Chairman or his representative. The Release 4 and 5 issues are handled by Work Item, not by Working Group, so it is important to have all information available together.
- 2) WGs are requested to pay more attention to the correct version number (v0.x.x means less than 50% complete, v2.0.0 is for approval etc.). Also, it was stressed that much more attention should be paid to the cover sheets. These cover sheets are important for the visibility in TSG-RAN plenary and are really required to understand the progress.

### General

#### RP-000528 Work Item sheets - latest situation (Secretary)

##### Decisions per Work Item:

1. *Low chip rate TDD option.*  
No changes were required to the WI sheet. Therefore the WI sheet was re-endorsed.
2. *Base station classification.*  
No changes were required to the WI sheet. Therefore the WI sheet was re-endorsed.
3. *FDD Base station classification.*  
No changes were required to the WI sheet. Therefore the WI sheet was re-endorsed.
4. *TDD Base station classification.*  
No changes were required to the WI sheet. Therefore the WI sheet was re-endorsed.
5. *UE positioning in UTRA TDD.*  
Replaced by 34. and 35.
6. *UE positioning in UTRA FDD.*  
Replaced by 34. and 35.
7. *Hybrid ARQ II/III.*  
No changes were required to the WI sheet. Therefore the WI sheet was re-endorsed.
8. *NodeB Synchronisation for TDD.*  
No changes were required to the WI sheet. Therefore the WI sheet was re-endorsed.
9. *UTRA FDD Repeater Specification.*  
No changes were required to the WI sheet. Therefore the WI sheet was re-endorsed.
10. *QoS optimization for AAL type 2 connections over Iub and Iur interfaces.*  
No changes were required to the WI sheet. Therefore the WI sheet was re-endorsed.
11. *Terminal power saving features.*  
No changes were required to the WI sheet. Therefore the WI sheet was re-endorsed.
12. *PS-Domain handover for real-time services.*  
No changes were required to the WI sheet. Therefore the WI sheet was re-endorsed.
13. *RAB Quality of Service Negotiation/Renegotiation over Iu.*  
No changes were required to the WI sheet. Therefore the WI sheet was re-endorsed.

14. *RRM optimizations for Iur and Iub.*  
No changes were required to the WI sheet. Therefore the WI sheet was re-endorsed.
15. *Radio access bearer support enhancement.*  
No changes were required to the WI sheet. Therefore the WI sheet was re-endorsed.
16. *Improvement of inter-frequency and inter-system measurements.*  
No changes were required to the WI sheet. Therefore the WI sheet was re-endorsed.
17. *Improved usage of downlink resource in FDD for CCTrCHs of dedicated type.*  
The WI was decided to be moved to Rel-5.
18. *IP Transport in UTRAN.*  
No changes were required to the WI sheet. Therefore the WI sheet was re-endorsed.
19. *Transcoder Free Operations in UTRAN*  
A revised WI sheet was provided in RP-000679, see agenda item 6.4.
20. *Evolution of the transport in the UTRAN.*  
No changes were required to the WI sheet. Therefore the WI sheet was re-endorsed.
21. *Radio Interface Improvement Feature.*  
The WI sheet needs to be revised based on the discussion on RP-000605. Francois Courau (Vice-Chairman) would provide this to be approved by e-mail (one week after distribution on the reflector).
22. *RAN Improvement Feature.*  
The WI sheet needs to be revised based on the discussion on RP-000605. Francois Courau (Vice-Chairman) would provide this to be approved by e-mail (one week after distribution on the reflector).
23. *UE Positioning.*  
The WI sheet was endorsed.
24. *Void.*  
This Work Item was deleted in TSG-RAN #9.
25. *Requirement on Equipment.*  
This Work Item was agreed to be deleted.
26. *Low Chip Rate TDD Physical Layer.*  
No changes were required to the WI sheet. Therefore the WI sheet was re-endorsed.
27. *Low chip rate TDD layer 2 and layer 3 protocol aspects.*  
No changes were required to the WI sheet. Therefore the WI sheet was re-endorsed.
28. *Low Chip Rate TDD RF Radio Transmission/ Reception, System Performance Requirements and Conformance Testing.*  
No changes were required to the WI sheet. Therefore the WI sheet was re-endorsed.
29. *Smart antenna.*  
Since smart antenna was already included in existing TDD, and no differences are foreseen for low chip rate TDD, this Work Item was agreed to be deleted.
30. *Low Chip Rate TDD UE radio access Capability.*  
No changes were required to the WI sheet. Therefore the WI sheet was re-endorsed.
31. *Low chip rate TDD UTRAN network Iub/Iur protocol aspects.*  
No changes were required to the WI sheet. Therefore the WI sheet was re-endorsed.
32. *RAB Quality of Service Negotiation over Iu.*  
No changes were required to the WI sheet. Therefore the WI sheet was re-endorsed.
33. *RAB Quality of Service Renegotiation over Iu.*  
No changes were required to the WI sheet. Therefore the WI sheet was re-endorsed.
34. *Iub/Iur interfaces for UE positioning methods supported on the radio interface release 99.*  
No changes were required to the WI sheet. Therefore the WI sheet was re-endorsed.
35. *UE positioning enhancements.*  
No changes were required to the WI sheet. Therefore the WI sheet was re-endorsed.

**36. RAN Technical Small Enhancements and Improvements.**

The WI sheet may need to be revised based on the discussion on RP-000605. Francois Courau (Vice-Chairman) would provide this to be approved by e-mail (one week after distribution on the reflector).

**37. DSCH power control improvement in soft handover.**

No changes were required to the WI sheet. Therefore the WI sheet was re-endorsed.

**38. Migration to Modification procedure.**

No changes were required to the WI sheet. Therefore the WI sheet was re-endorsed.

**39. UMTS 1800.**

No changes were required to the WI sheet. Therefore the WI sheet was re-endorsed.

**RP-000529 Study Item sheets - latest situation (Secretary)**

**Decisions per Study Item:**

**1. Radio link performance enhancements.**

No changes were required to the SI sheet. Therefore the SI sheet was re-endorsed.

**2. High speed downlink packet access.**

No changes were required to the SI sheet. Therefore the SI sheet was re-endorsed.

**3. USTS.**

A revised WI sheet was provided in RP-000702, see agenda item 6.6.11, but was withdrawn. Currently no changes were required to the SI sheet. Therefore the SI sheet was re-endorsed.

**4. Feasibility Study for Improved Common DL Channel for Cell-FACH State.**

No changes were required to the SI sheet. Therefore the SI sheet was re-endorsed.

**5. Feasibility Study of UE antenna efficiency test methods performance requirements**

No changes were required to the SI sheet. Therefore the SI sheet was re-endorsed.

**RP-000655** Cover sheet for TR 25.946 (TSG-RAN WG3)

**RP-000656** TR 25.946 v0.1.1 (TSG-RAN WG3)

Carolyn Taylor (TSG-RAN WG3 Secretary) presented this TR.

**Decision:** The TR was noted.

6.2.3.2 RAB Quality of Service Re-negotiation over Iu

Status

See RP-000705. This WI is not very stable and it is not impossible to be finished by March, but unlikely.

**RP-000659** Cover sheet for TR 25.851 (TSG-RAN WG3)

**RP-000660** TR 25.851 v0.0.2 (TSG-RAN WG3)

Carolyn Taylor (TSG-RAN WG3 Secretary) presented this TR.

**Decision:** The TR was noted.

## 6.3 Evolution of the transport in the UTRAN

### 6.3.1 IP Transport in UTRAN

Status

See RP-000705.

**RP-000643** Cover sheet for TR 25.933 (TSG-RAN WG3)

**RP-000644** TR 25.933 v0.4.0 (TSG-RAN WG3)

Carolyn Taylor (TSG-RAN WG3 Secretary) presented this TR.

**Decision:** The TR was noted.

### 6.3.2 QoS optimization for AAL type 2 connections over Iub and Iur interfaces

Status

See RP-000705.

**RP-000645** Cover sheet for TR 25.934 (TSG-RAN WG3)

**RP-000646** TR 25.934 v0.2.1 (TSG-RAN WG3)

Carolyn Taylor (TSG-RAN WG3 Secretary) presented this TR.

**Decision:** The TR was noted.

## 6.4 Transcoder Free Operations in UTRAN

Status

See RP-000705. There is a high risk that this will not be finished.

**RP-000679 Revised WI sheet for WI "Transcoder Free Operation" (TSG-RAN WG3)**

Carolyn Taylor (TSG-RAN WG3 Secretary) presented this WI sheet.

**Discussion:** The leading group on this issue is CN.

**Decision:** The WI sheet was endorsed.

**RP-000663 Cover sheet for TR 25.953 (TSG-RAN WG3)**

**RP-000664 TR 25.953 v0.0.3 (TSG-RAN WG3)**

Carolyn Taylor (TSG-RAN WG3 Secretary) presented this TR.

**Decision:** The TR was noted.

## 6.5 UE Positioning

### 6.5.1 Iub/Iur interfaces for UE positioning methods supported on the radio interface Release '99

Status

See RP-000705. No problem is foreseen in completing this WI. It was noted that it was important to finish. There was company support for this issue. Input was required to finish it.

**RP-000657 Cover sheet for TR 25.850 (TSG-RAN WG3)**

**RP-000658 TR 25.850 v0.0.2 (TSG-RAN WG3)**

Carolyn Taylor (TSG-RAN WG3 Secretary) presented this TR.

**Discussion:** The cover sheet was wrong and would be replaced.

**Decision:** The TR was noted.

### 6.5.2 UE positioning enhancements

Status

See RP-000554.

**RP-000580 Cover Sheet for TR 25.847 (TSG-RAN WG2)**

**RP-000581 TR 25.847 v1.0.0 (TSG-RAN WG2)**

Hans van der Veen (TSG-RAN WG2 Secretary) presented this TR.

**Discussion:** The cover sheet was not very informative, as it was not complete. The OTDOA-PE had not been decided on in the UP Ad Hoc yet. The concept had not been agreed yet. WG1 had sent an LS to say that various impacts on WG1 are unclear.

**Decision:** The TR was noted.

## 6.6 Radio Interface Improvement Feature

### 6.6.1 Improved usage of downlink resource in FDD for CCTrCHs of dedicated type

#### Status

No progress. It was decided to move this WI for Rel-5. The WG2 Chairman's view was that this could be finished by September 2001 (estimate). This was approved.

### 6.6.2 Radio access bearer support enhancement

#### Status

See RP-000554. Work on ROHC was done mostly in IETF, was in time and the timing in IETF looked compatible with a March approval. Work on header removal was done in TSG-GERAN. For WG3, it was clear that TSG-SA WG2 needed to provide input, so the issues depending on that were not foreseen to be finished by March.

#### **RP-000559 Cover Sheet for TR 25.844 (TSG-RAN WG2)**

#### **RP-000560 TR 25.844 v1.0.0 (TSG-RAN WG2)**

Hans van der Veen (TSG-RAN WG2 Secretary) presented this TR.

**Decision:** The TR was noted.

### 6.6.3 Hybrid ARQ II/III

#### Status

No progress (Rel-5 item). The WI may not be necessary any longer, since the work may be covered by the SI HSDPA. The TR was dormant. For the time being it was left as it is.

#### **RP-000637 Cover sheet for TR 25.837 (TSG-RAN WG3)**

#### **RP-000638 TR 25.837 v0.1.0 (TSG-RAN WG3)**

Carolyn Taylor (TSG-RAN WG3 Secretary) presented this TR.

**Decision:** The TR was noted.

### 6.6.4 Study item: High speed downlink packet access

#### Status

See RP-000554. There was no progress in WG2, but there would be an Ad Hoc meeting in January in WG2 to progress the issue. Some progress was made in WG1. There could be a joint WG1/WG2 meeting on this issue also between now. The WG1 report TR 25.848 was not felt to be in a state to be seen by TSG-RAN yet.

**RP-000582** Cover Sheet for TR 25.950 (TSG-RAN WG2)

**RP-000583** TR 25.950 v0.x.x (TSG-RAN WG2)

This document was withdrawn as there had been no progress compared to TSG-RAN #6.

**6.6.5** Study item: Feasibility Study for Improved Common DL Channel for Cell-FACH State

Status

See RP-000554. This issue would also be treated in the Ad Hoc in January at which HSDPA is going to be discussed.

**6.6.6** Terminal power saving features

Status

See RP-000694 below.

**RP-000676** Status report for the work item "Terminal Power Saving Features" (TSG-RAN WG1)

**RP-000681** Status report for the work item "Terminal Power Saving Features" (TSG-RAN WG1)

**RP-000694** Status report for the work item "Terminal Power Saving Features" (TSG-RAN WG1)

Antti Toskala (TSG-RAN WG1 Chairman) presented this status report. RP-000676 was replaced by RP-000681, which was in turn replaced by RP-000694.

**Discussion:** There is doubt in WG2 that this WI is feasible in the network. WG2 has many questions, but has not had time in its last meeting to treat the WI. There is therefore a risk that this WI cannot be finished. The proponents of the WI believe it can be finished. However, it was pointed out that quite a lot of work can be foreseen for both WG2 and WG4 and that some impacts may have been overlooked. Several new issues could be identified.

**Decision:** The status report was noted.

**RP-000552** Cover Sheet for TR 25.840 (TSG-RAN WG1)

**RP-000680** Cover Sheet for TR 25.840 (TSG-RAN WG1)

**RP-000548** TR 25.840 v2.0.0 (TSG-RAN WG1)

Antti Toskala (TSG-RAN WG1 Chairman) presented this TR. RP-000552 was replaced by RP-000680.

**Discussion:** The results were based on not using compressed mode. It was stated that using compressed mode would yield quite different results. All graphs were WG1-only results. WG2 and WG4 results were not covered. The graphs were based on random patterns. WG1 had not understood that v2.0.0 meant "for approval". The part that is not complete was not mentioned on the cover sheet.

**Decision:** Because of several open issues, the TR was noted, but not approved. In response to some questions, it was clarified that this feature was optional. If a UE capability says you support DSCH, the question is if that automatically means that gated transmission is supported. This was not clear yet. There was concern expressed that support of DSCH would be inextricably linked to support of gated transmission. The issue of optionality would be discussed in WG1. WG1 would come with a proposal and would circulate the proposal to other WGs for comment and finally discussion and decision at TSG-RAN plenary #11.

**RP-000653 Cover sheet for TR 25.938 (TSG-RAN WG3)**

**RP-000654 TR 25.938 v0.1.1 (TSG-RAN WG3)**

**Decision:** The TR was noted.

### 6.6.7 Smart antenna

Status

This WI has been deleted, see discussion above (under RP-000528).

### 6.6.8 NodeB Synchronisation for TDD

Status

See RP-000536. No further work is needed in WG1. WG4 had made some progress on this WI (see RP-000698).

**RP-000551 Cover Sheet for TR 25.836 (TSG-RAN WG1)**

**RP-000547 TR 25.836 v2.0.0 (TSG-RAN WG1)**

Antti Toskala (TSG-RAN WG1 Chairman) presented this TR.

**Discussion:** There was a opinion that this TR should not be approved from the same reason that TR on Terminal Power Saving was not approved. The rapporteur believed that the impact on WG2 would be minimal. The changes could probably be made directly to the relevant specifications. WG4 also did not foresee any problem. In response to the above question of procedure (since the Terminal Saving Feature was not approved), it was pointed out that there was a big difference between the open issues in both cases. In one case (Terminal Saving Feature) there were major concerns from another WG. In the other (this one) very small changes were foreseen. The Chairman stated that this was a case-by-case issue.

**Decision:** The TR was approved and placed under Change Control.

**RP-000639 Cover sheet for TR 25.838 (TSG-RAN WG3)**

**RP-000640 TR 25.838 v0.1.1 (TSG-RAN WG3)**

**Decision:** The TR was noted.

### 6.6.9 Improvement of inter-frequency and inter-system measurements

Status

See RP-000536. This was postponed to Rel-5 in TSG-RAN #9.

### 6.6.10 Study item: Radio link performance enhancements

Status

See RP-000536. DSCH power control improvement had been taken out already in a separate WI and no other WIs had been identified yet.

## 6.6.11 Study item: USTS

Status

See RP-000701.

### **RP-000701 Status Report for the Study Item “Uplink Synchronous Transmission Scheme” (Rapporteur)**

Antti Toskala (TSG-RAN WG1 Chairman) presented this status report.

**Decision:** The status report was noted.

### **RP-000702 Revised SI sheet "USTS" (SK Telekom)**

This document was withdrawn.

### **RP-000700 USTS Cover Sheet (SK Telekom)**

This document was withdrawn.

### **RP-000641 Cover sheet for TR 25.839 (TSG-RAN WG3)**

#### **RP-000642 TR 25.839 v0.1.0 (TSG-RAN WG3)**

Carolyn Taylor (TSG-RAN WG3 Secretary) presented this TR.

**Decision:** The TR was noted.

## 6.6.12 DSCH power control improvement in soft handover

Status

See RP-000536. WG3 has a separate TR that was in a very early stage and not submitted.

### **RP-000553 Cover Sheet for TR 25.841 (TSG-RAN WG1)**

#### **RP-000549 TR 25.841 v2.0.0 (TSG-RAN WG1)**

Antti Toskala (TSG-RAN WG1 Chairman) presented this TR.

**Discussion:** There was one topic that could or could not be added, but it was to be decided still.

**Decision:** The TR was approved and placed under Change Control.

## 6.7 Low chip rate TDD option

### **RP-000690 Comments on LS from RAN WG4 on coexistence of 1.28 MCPS TDD and 3.84 MCPA TDD (Telia)**

This document was for information.

### 6.7.1 Low Chip Rate TDD Physical Layer

Status

See RP-000536. No more work was done on the TR, as work had been progressed on the 'working CRs'. It was not WG1's intention to bring the TR for approval any longer. After some discussion, it was decided that

for visibility reasons it is better to approve the TR. The contents were stable, but the TR had not been submitted by WG1 this time. The TR would be submitted for approval in TSG-RAN #11.

## 6.7.2 Low chip rate TDD layer 2 and layer 3 protocol aspects

Status

See RP-000554.

### **RP-000555 Cover Sheet for TR 25.834 (TSG-RAN WG2)**

#### **RP-000556 TR 25.834 v2.0.0 (TSG-RAN WG2)**

Hans van der Veen (TSG-RAN WG2 Secretary) presented this TR.

**Decision:** The TR was approved and placed under change control.

## 6.7.3 Low Chip Rate TDD UE radio access Capability

Status

See RP-000554. The final details needed to be checked in WG1 again before a CR could be agreed by WG1. The data was sufficient for the TR though. First submission of CRs on layer 1 issues would be to WG1, which would inform WG2 of the results.

### **RP-000557 Cover Sheet for TR 25.843 (TSG-RAN WG2)**

#### **RP-000558 TR 25.843 v2.0.0 (TSG-RAN WG2)**

Hans van der Veen (TSG-RAN WG2 Secretary) presented this TR.

**Decision:** The TR was approved and placed under change control.

## 6.7.4 Low chip rate TDD UTRAN network lub/lur protocol aspects

Status

See RP-000705. Under some conditions (as mentioned in the document), the deadline of March is feasible.

### **RP-000651 Cover sheet for TR 25.937 (TSG-RAN WG3)**

#### **RP-000652 TR 25.937 v0.3.1 (TSG-RAN WG3)**

#### **RP-000685 Cover sheet for TR 25.937 (TSG-RAN WG3)**

#### **RP-000686 TR 25.937 v0.3.1 (TSG-RAN WG3)**

RP-000651 had been replaced by RP-000685. RP-000652 had been replaced by RP-000686.

**Decision:** The TR was noted.

## 6.7.5 Low chip Rate TDD RF Radio Transmission/ Reception, System Performance Requirements and Conformance Testing

Status

See RP-000698.

#### **RP-000677 Cover sheet for TR 25.945 (TSG-RAN WG4)**

#### **RP-000678 TR 25.945 v2.0.0 (TSG-RAN WG4)**

Howard Benn (TSG-RAN WG4 Chairman) presented this TR.

**Discussion:** The TR was for approval. Since base station to base station interference had not yet been analysed, some delegates felt that the TR could not yet be approved. Although analysis requested at TSG-RAN #9 to WG4 was completed, there was concern from several operators on the conclusion that there was no severe interference between the TDD options. The condition under which this conclusion was valid were felt by the operators to be not sufficient. Still, the WG4 chairman believed that this TR was more than 80% complete.

**Decision:** The TR was noted. TSG-RAN believes that this TR is nearly completed. However, the base station to base station interference scenario needs to be further analysed and solutions for interworking found. WG4 was tasked to do this work.

## **6.8 RAN Technical Small Enhancements and Improvements**

Some issues were put under this by TSG-RAN WG4. See RP-000698. TR 25.846 was now no longer needed.

### **6.9 Others**

#### **6.9.1 UMTS 1800**

Status

See RP-000698.

#### **6.9.2 Migration to Modification procedure**

Status

See RP-000705. Although no report is yet available, the impact seems low and it is not impossible that it can be finished by TSG-RAN #11 plenary.

#### **6.9.3 Others**

#### **RP-000661 Cover sheet for TR 25.852 (TSG-RAN WG3)**

#### **RP-000662 TR 25.852 vx.x.x (TSG-RAN WG3)**

This document was withdrawn.

#### **RP-000683 Proposed Rel-5 WI "IP-based UTRAN architecture" (Nokia)**

#### **RP-000691 Proposed way forward with the WI "IP-based UTRAN architecture" (Nokia)**

#### **RP-000712 Presentation on the work item "IP based UTRAN architecture" (Nokia)**

Antti Toskala (Nokia) presented these documents.

**Discussion:** The WI sheet was a first proposal. It was intended to be revised by an Ad Hoc meeting (with TSG-GERAN and possibly TSG-SA WG2 and/or TSG-SA WG3) if such a meeting was agreed upon, since it

was a big WI. It was commented that the results of the existing WI "IP transport" need to be taken into account. The intention was not to move all functionality from RNC to Node B as might be interpreted from the slides. The interaction between HSDPA and this WI needed further study as well. The objectives were not very clear. The topic of an Ad Hoc meeting could be a feasibility study, looking into framework interaction and operational requirements. This could then produce a clearer proposal.

**Decision:** The document was noted. Antti Toskala (Nokia) and Francois Courau (Vice-Chairman) would draft a scope of the Ad Hoc meeting and identify possible dates. A draft invitation to the Workshop can be found in RP-000711 (see Agenda Item 10).

#### **RP-000713 Proposed Work Item description sheet for the inclusion of Multicast capability in RAN (Nokia)**

Antti Toskala (Nokia) presented this document.

**Discussion:** There was a suggestion to go to TSG-SA with this proposed WI first. There was a BMC specification already in WG2, which could be enhanced.

**Decision:** The WI was noted. The proponent was encouraged to submit the WI to TSG-SA. If this was difficult, discuss on the TSG-RAN e-mail reflector and in any case start a discussion in WG2 for specific technologies.

#### **RP-000689 Intra Domain Connection of RAN Nodes to Multiple CN Nodes: Overall System Architecture (Vodafone Group)**

Amer El-Saigh (Vodafone Group) presented this document.

**Discussion:** It was felt it might be best to leave the target date open and ask WG3 (and WG2) to express an opinion, since it was the group who would do most work. It was difficult in TSG-RAN to agree a target date.

**Decision:** Under the condition that the feature was approved in TSG-SA, the WI was approved as a building block. No conclusion was reached on the target date. Feedback from WG2 and WG3 would be requested, which would be conveyed to TSG-RAN, TSG-CN and TSG-SA after the plenaries. The deadline for providing the feedback would be after the first WG2 and WG3 meetings following this plenary.

#### **RP-000704 SA5-led Work Items for Release 2000 (UTRAN Operations and Maintenance procedures) (TSG-SA WG5)**

Niels Skov Andersen (TSG-SA Chairman) presented this document.

**Discussion:** For testing and OAM specifications, the Rel-4 deadline was on purpose not specified very tightly. It was important to make sure that multi-vendor support would be only on interfaces where it would work. More information was needed for TSG-RAN WG3. Transport of OAM information was already available in TSG-RAN; however, this was only the transport of the information, not what was controlled. The main intention of this WI was understood to be to connect the TSG-RAN OAM issues to the main OAM system. The "top of the object tree" was specified by TSG-SA WG5, but the contents "below" (object modelling) needed to be developed by WG3. For R'99 the modelling had not been done.

**Decision:** The WI was noted. Feedback to TSG-SA WG5 from WG3 in particular would be requested, which would be conveyed to TSG-RAN, TSG-CN and TSG-SA after the plenaries. Other WGs were requested to check if there was any impact on their work. The deadline for providing the feedback would be after the first WG meetings following this plenary. The issue that more information was needed would be flagged by the TSG-RAN Chairman to TSG-SA.

## **6.10 Overall RAN work plan**

#### **RP-000602 Workplan (MCC)**

Alain Sultan (MCC) presented this document.

**Discussion:** There are several WIs in the workplan for which TSG-RAN WGs are asked to do work. However, little or no information is made available to the TSG-RAN WGs on those issues.

**Decision:** The document was noted.

#### **RP-000603MCC review of workplan (MCC)**

Alain Sultan (MCC) presented this document.

**Decision:** The document was noted. The report from WG3 on delay budget would be brought to the attention of TSG-SA by the TSG-RAN Chairman.

## 7 Technical co-ordination among WGs

There was no input for this agenda item.

---

## 8 Output to other groups

### 8.1 TSG-SA

#### General

For all forms:

- The "Abstract of Document" and "Contentious Issues" should be removed.
- "Accepted by TSG 10" should be removed (is for TSG-SA use).

#### **RP-000714TSG-RAN WG1 Release 4 Submission forms (TSG-RAN WG1 Chairman)**

Antti Toskala (TSG-RAN WG1 Chairman) presented these Release 4 Submission forms.

**Decision:** The forms were approved.

#### **RP-000716TSG-RAN WG2 Release 4 Submission forms (TSG-RAN WG2 Chairman)**

Hans van der Veen (TSG-RAN WG2 Secretary) presented these Release 4 Submission forms.

**Discussion:**

- RAB support enhancements: would have March deadline.
- CCTrCHs: would not be submitted (earlier decision).
- UE positioning: would have March deadline.

**Decision:** The forms were approved with these changes.

#### **RP-000707TSG-RAN WG3 Release 4 Submission forms (TSG-RAN WG3 Secretary)**

Carolyn Taylor (TSG-RAN WG3 Secretary) presented these Release 4 Submission forms.

**Discussion:**

- For all, the "Tasks not completed" should be "CRs" or "CRs to be generated".
- TrFO is missing and would be produced according to earlier decisions.

**Decision:** The forms were approved with these changes.

#### **RP-000706TSG-RAN WG4 Release 4 Submission forms (TSG-RAN WG4 Chairman)**

Howard Benn (TSG-RAN WG4 Chairman) presented these Release 4 Submission forms.

**Discussion:**

- The "Specifications affected" needed to be filled out in full (not "See WI sheet").
- RAN small TEI: would not be submitted.

**Decision:** The forms were approved with these changes.

## 8.2 ITU-R

*RP-000709 Comments on the update procedure for revisions of Recommendation ITU-R M.1457 (ITU-R Ad Hoc) (see agenda item 5.5)*

*RP-000718 Submission of future updates of WCDMA to ITU-R WP 8F (ITU-R Ad Hoc) (see agenda item 5.5)*

## 9 Project management

### **RP-000599 CRs to TS 21.900 (MCC)**

John Meredith (MCC) presented this document.

**Discussion:** These were CRs for a TSG-SA document. Any comments were requested to be given directly to the author, preferably before TSG-SA, who would be requested to approve the CRs.

**Decision:** The document was noted.

### **RP-000531 CRs and moving to next release (MCC)**

John Meredith (MCC) presented this document.

**Decision:** The document was noted.

### **RP-000532 Changes to stock text in the "References" clause of 3GPP specs (MCC)**

John Meredith (MCC) presented this document.

**Discussion:** An update of this document was going to be handled in TSG-SA.

**Decision:** The document was noted.

### **RP-000604 Change tracking procedures for workplan (MCC)**

Alain Sultan (MCC) presented this document.

**Discussion:** MS Project does not have a possibility to track changes; therefore this document proposed a procedure to keep track of changes. Endorsement was requested in all TSGs.

**Decision:** The document was endorsed.

### **RP-000605 TEI - Generic work items (MCC)**

Alain Sultan (MCC) presented this document.

**Discussion:** Rather than a separate TEI for RAN, for CN etc., it was proposed to have one TEI for all groups.

**Decision:** The document was noted. There were similar comments as in the TSG-RAN #9 meeting in Hawaii and it was recommended to use the WI description for that instead as the basis. The proposal was supported in principle, under the condition that the wording was carefully drafted. The existing RAN small TEI would be deleted after the TEI approved by TSG-SA was circulated on the TSG-RAN e-mail reflector for approval within one week.

**RP-000717 Guidance on Implementing CRs to Release 99 and Release 4 on the same specification before creation of the Release 4 version (Ad Hoc Group)**

Francois Courau (TSG-RAN Vice-Chairman) presented this document.

**Decision:** The document was noted. The document needed to be presented to the WGs and the WGs need to conform to the procedures described.

---

## 10 Any Other Business

**RP-000711 Draft Invitation to the workshop on UTRAN evolution (Drafting Group)**

Antti Toskala (Nokia) presented this document.

**Discussion:** The document had been developed in the draft session agreed while discussion the Nokia-proposed Work Item on IP based UTRAN architecture (see agenda item 6.9.3). The name of the workshop could be interpreted wrongly. To make it clearer, in the first paragraph "e.g." would be changed to "i.e."

**Decision:** The document was noted.

---

## 11 Closing of meeting

Yukitsuna Furuya (Chairman) thanked the host for the organisation and the delegates for their participation.

## Annex D: Principles for handling of Release '99 corrections in the TSG-RAN WGs

- Corrections shall be limited to those parts where there is something to correct. The need for correction shall not be used as a reason to do functional changes; unless there are compelling reasons, (i.e. if there is no other way to do the correction), agreed by consensus.
- When handling the correction, clear reasons shall be presented for the changes and these changes shall be documented in the CR cover sheet.
- If Ad Hocs etc. activities are used to solved problems, the changes agreed in the Ad Hoc need to be documented including the reasons why the change was necessary. The bigger the change, the more attention should be paid to the report etc.to improve the efficiency of the actual WG handling the CR and to ensure full visibility of the process for those not able to participate in the Ad Hoc.
