Title: Status report on Work Item of LCRTDD-CAP

Agenda: 6.7.3

This document provides a status report of the work item ‘Low chip rate TDD UE Radio Access Capabilities’.

The Technical Report TR25.843 “1.28Mcps TDD UE radio access capabilities” was created in August 21st-25th during RAN WG2#15 meeting and approved in RAN#10 meeting in December and the version of TR25.843 is 4.0.0.

UE radio access capability combinations have been sent to RAN WG1 for review in a liaison statement in RAN WG2#17 meeting and comments resulting from the review were captured.

A change request to 25.306 capturing the impact of 1.28 Mcps TDD was presented and agreed in RAN2#18 meeting. Revision of the change request to 25.306 was presented and agreed at RAN2#19 meeting as well as a change request to 25.843 in order to update the technical report with the latest changes.

The following TR and CRs are completed for this work item:

| | |
|---------------|--------|
| TR25.843 | V4.0.0 |
| CR for 25.843 | CR001 |
| CR for 25.306 | CR003 |

Work concerning work item “Low chip rate TDD UE Radio Access Capabilities” is therefore finished within RAN WG2.
