Title: WI on RAB Quality of Service Negotiation over Iu during relocation
Document for: Decision

Work Item Description

Title
RAB Quality of Service Negotiation over Iu during relocation

1 3GPP Work Area

X	Radio Access
X	Core Network
	Services

2 **Linked work items**

None

3 **Justification**

In release 99, for services that could accept looser QoS requirements than those requested by the CN in the relocation request, there exist no means for UTRAN to propose alternative (looser) QoS. For such services the relocation will fail.

4 **Objective**

This work item should enhance the relocation so that QoS parameters can be negotiated by the UTRAN during relocation. However, it should be as simple as possible.

5 **Service Aspects**

The intention of the work item is to allow continuation of service during relocation

6 **MMI-Aspects**

None

7 **Charging Aspects**

None

8 **Security Aspects**

None
