

Presentation of Specification to TSG or WG

Presentation to: TSG-RAN Meeting #11

Document for presentation: TR 25.850 Version 2.0.0

Presented for: Approval

Abstract of document:

The present document is to help the TSG RAN WG3 group to specify the changes to existing specifications, needed for the introduction of the UE positioning in UTRAN for Release 2000. Based on [1], standard location services are defined as the: cell coverage based positioning method; OTDOA method with network configurable idle periods; and network assisted GPS method.

Since cell coverage based positioning method in WG3 group is already standardised this document will cover the Iub/Iur protocol aspects for OTDOA method with network configurable idle periods and network assisted GPS method.

It is intended to gather all information in order to trace the history and the status of the Work Task in RAN WG3. It is not intended to replace contributions and Change Requests, but only to list conclusions and make reference to agreed contributions and CRs. When solutions are sufficiently stable, the CRs can be issued.

It identifies the affected specifications with related Change Requests.

Changes since last presentation to TSG-RAN Meeting #10:

Updated according agreed text proposals during RAN3#18. Updated according agreed text proposals during RAN3#19.

Outstanding Issues:

None.

Contentious Issues:

None.
