

## Presentation of Specification to TSG or WG

---

**Presentation to:** TSG-RAN Meeting #11

**Document for presentation:** TR 25.838 Version 2.0.0

**Presented for:** Approval

---

### Abstract of document:

The present document is to help the TSG RAN WG3 group to specify the changes to existing WG3 specifications, needed for the introduction of the “Node B Synchronisation for TDD”. It is intended to gather all information in order to trace the history and the status of the Work Task in RAN WG3. It is not intended to replace contributions and Change Requests, but only to list conclusions and make reference to agreed contributions and CRs. When solutions are sufficiently stable, the CRs can be issued.

This TR describes agreed requirements related to the Work Task, and split the Work Task into “Study Areas” in order to group contributions in a consistent way.
