

TSG-RAN meeting #11
Palm Springs, CA, USA, 13-16 March 2001

RP#11(01)0252

Agenda Item: 6.2.3
Source: RAN3 Chair
Title: Information regarding LS from S2 asking for delay of RAB QoS WI to Rel5
Document for: Information
Date: 2001-03-15

The attached LS was approved and sent during the SA2 meeting in Göteborg (26 March – 2 February). The LS is expected to officially arrive to the next RAN3 meeting (2- 6 April in Beijing), this LS has thus not been discussed by RAN3 yet.

The LS is asking RAN3 to move the RAB QoS negotiation function to Rel-5. The rationale stated in the LS is a risk that the currently selected solution for RAB QoS negotiation may not fit into the overall real time IP solution of 3GPP release 5.
