Title: Status Report of Work Item Open interface between the SMLC and the SRNC within the UTRAN to support Rel'4 positioning methods

Document for: Information

Status

RAN WG2 #22: The CR to 25.305 to include support for all Rel4 positioning methods in the open interface between SMLC and SRNC was presented in RAN WG2. The Chairman raised a concern that the Work Item description does not mention changes in the functional split between nodes. To allow changes in the functional split, the Work Item description would need to be revised. This needs to be discussed in TSG RAN.

RAN WG2 #23: The CR to 25.305 was modified not to contain any changes in the functional split between nodes. The modified CR was agreed in RAN WG2.
