

**Status Report for WI to TSG**

**Work Item Name: NAS Node Selection Function**

**SOURCE:** Rapporteur

**TSG:** RAN

**WG:** 3

**E-mail address rapporteur:** [brendan.mcwilliams@vf.vodafone.co.uk](mailto:brendan.mcwilliams@vf.vodafone.co.uk)

**Ref. to WI sheet:** RAN\_Work\_Items.doc

**Progress Report since the last TSG (for all involved WGs):**

- RAN3: Following SA Plenary #13, TS 23.236 (SA2 Stage II Document) was felt to be in a sufficiently 'mature' state such that all other affected groups could begin work on this item. This prompted a return to the study of TR 25.875 in RAN3, following its previous 'suspension' (pending the SA2 work).
- Contributions were presented at RAN3 #24 and agreements were included in the technical report.
- At RAN3 #25, the R3 internal technical report TR 25.875 was agreed as version 0.1.0.

**List of Completed elements (for complex work items):**

-

**List of open issues:**

One open issue resulted from the discussion during RAN3 #24:

‘The handling of Paging Responses in the event of MSC/VLR failure.’

Awaiting response from SA2 and RAN2 in completing this issue.

**Estimates of the level of completion (when possible):**

No official agreements have been made in RAN3, however draft CRs have been discussed and are close to agreement.  
Estimated level of completion: 60%

**WI completion date review resulting from the discussion at the working group:**

TSG RAN #15.
