TSG RAN thanks TSG GERAN for their LS concerning MBMS. TSG-RAN agrees on the list of issues and questions which are raised regarding the radio interface aspects of MBMS, and the need to better understand the service requirements and the overall architecture before a clear understanding of the needed RAN activities can proceed.

TSG-RAN would like to suggest that a joint meeting is held between RAN WG2, RAN WG3, SA WG1, SA WG2 and GERAN so as to progress rapidly on MBMS.

Actions

Chairmen to co-ordinate so as to define a date and an agenda for the joint meeting.
