Progress Report since the last TSG (for all involved WGs):

Solution based on Shared Network Areas (SNAs) has been agreed.

Necessary CRs for TSes 25.401, 25.413 and 25.423 agreed at RAN WG3 meeting #31.

CN4 has produced two set of CRs. The first set being all the necessary modifications needed if the transport of the SNA Access Information at MAP level is used. This set consists of one CR on 29.002 and one on 29.010. The second set being all the necessary modifications needed if the transport of the SNA Access Information at BSSMAP level is used. This second set of CR's was preferred by the majority in CN4, but depends on the approval at GERAN. This set consists of only one CR on 29.010.

CN4 has also produced and agreed two additional CR's, one of them together with CN1. Those CR's, on 23.003 and 23.009, are equally applicable for both solutions mentioned above.
