TSG-RAN meeting #26
Athens, Greece, 8th - 10th December 2004

Tdoc RP-040503

Source:	**RAN3**
Title:	**Review of RAN3 ToRs**
Agenda item:	**5.2.2**
Document for:	**discussion and approval**

1 Introduction

RAN3 was tasked to review the RAN3 ToR. This document collects comments received during email approval after RAN3#45.

2 Discussion

Based on the current Terms of Reference for RAN3 as captured on the 3GPP webside the following modification is proposed:

RAN WG3 is responsible for:

- Overall UTRAN architecture (25.401)

- Synchronisation in UTRAN (25.402)

- Stage 2 work of Work Items allocated by TSG RAN to RAN WG3

- Iu interface protocol specifications, i.e. access stratum protocols over the Iu reference point (25.41x series)

- Iur and Iub interface protocol specifications (25.42x and 25.43x series of specifications)

- UTRAN Iupc interface protocol specifications (25.45x series of specifications)

- Transport of implementation specific O&M between the Management System and Node B (25.442)

- Application of the RANAP on the E-interface (29.108)

- Iu-ant interface protocol specifications (RF-parts of the layer 1 specification are under the responsibility of RAN4)

- Parts of Iu and Iur protocols common to GERAN and UTRAN (Iu-g and Iur-g)

Furthermore, TSG RAN may allocate other tasks to RAN WG3, such as overall delay budget of the access stratum.

4 Conclusion & Proposal

It is proposed to agree on the updated RAN3 ToR as shown above.
