

**TSG-RAN Meeting #27**  
**Tokyo, Japan, 09-11 March 2005**

**RP-050077**  
**Agenda item 9.4**

Source: TSG-RAN WG2

Title: 25.304 CR to Rel-6 on MBMS

Spec	CR	Rev	Phase	Subject	Cat	Version-Current	Version-New	Doc-2nd-Level	Workitem
25.304	134	-	Rel-6	MBMS Scope	F	6.4.0	6.5.0	R2-050654	MBMS-RAN

## CHANGE REQUEST

# 25.304 CR 134 # rev - # Current version: 6.4.0 #

For **HELP** on using this form, see bottom of this page or look at the pop-up text over the # symbols.

**Proposed change affects:** UICC apps#  ME  Radio Access Network  Core Network

<b>Title:</b>	# MBMS Scope				
<b>Source:</b>	# RAN WG2				
<b>Work item code:</b>	# MBMS-RAN	<b>Date:</b>	# 18/02/2005		
<b>Category:</b>	# <b>F</b>	<b>Release:</b>	# Rel-6		
	Use <u>one</u> of the following categories:		Use <u>one</u> of the following releases:		
	<b>F</b> (correction)		Ph2 (GSM Phase 2)		
	<b>A</b> (corresponds to a correction in an earlier release)		R96 (Release 1996)		
	<b>B</b> (addition of feature),		R97 (Release 1997)		
	<b>C</b> (functional modification of feature)		R98 (Release 1998)		
	<b>D</b> (editorial modification)		R99 (Release 1999)		
	Detailed explanations of the above categories can be found in 3GPP <a href="#">TR 21.900</a> .		Rel-4 (Release 4)		
			Rel-5 (Release 5)		
			Rel-6 (Release 6)		
			Rel-7 (Release 7)		

<b>Reason for change:</b>	# The current scope seems to imply that the specification only addresses the MBMS impact in idle-mode procedures.
<b>Summary of change:</b>	# Clarified the MBMS sentence in the scope section to mean that the specification <b>also</b> addresses MBMS and reselection procedures are impacted in general (ie. Also connected mode).
<b>Consequences if not approved:</b>	# The scope of the specification maybe misinterpreted from Rel-6 onwards.

<b>Clauses affected:</b>	# 1

### How to create CRs using this form:

Comprehensive information and tips about how to create CRs can be found at <http://www.3gpp.org/specs/CR.htm>. Below is a brief summary:

- 1) Fill out the above form. The symbols above marked # contain pop-up help information about the field that they are closest to.
- 2) Obtain the latest version for the release of the specification to which the change is proposed. Use the MS Word "revision marks" feature (also known as "track changes") when making the changes. All 3GPP specifications can be

downloaded from the 3GPP server under <ftp://ftp.3gpp.org/specs/> For the latest version, look for the directory name with the latest date e.g. 2001-03 contains the specifications resulting from the March 2001 TSG meetings.

- 3) With "track changes" disabled, paste the entire CR form (use CTRL-A to select it) into the specification just in front of the clause containing the first piece of changed text. Delete those parts of the specification which are not relevant to the change request.

---

# 1 Scope

The present document specifies the Access Stratum (AS) part of the Idle Mode procedures applicable to a UE. The non-access stratum (NAS) part of Idle mode procedures and processes is specified in [5].

The present document also specifies cell selection and reselection processes applicable to UEs in connected mode. Invocation of these processes is described in [4].

The present document specifies the model for the functional division between the NAS and AS in a UE.

The present document applies to all UEs that support at least UTRA, including multi-RAT UEs as described in 3GPP specifications, in the following cases:

- When the UE is camped on a UTRA cell;
- When the UE is searching for a cell to camp on;

NOTE: The details for those cases are described in the specifications of the other RAT.

The present document presents also examples of inter-layer procedures related to the idle mode processes and describes idle mode functionality of a dual RAT UTRA/GSM UE.

The present document [also](#) specifies how idle-mode [and reselection](#) procedures are affected by the provision of MBMS services.
