

TSG-RAN Working Group 2 meeting #3
13 – 16 April 1999
Yokohama, Japan

TSGR2#3(99)273

**3GPP TSG RAN WG2 #1
22-26 March 1999
Stockholm, Sweden**

Tdoc RAN WG1 325/99

Title: Liaison statement to WG2: Physical channel for FACH

To: TSG RAN WG2

Source: TSG RAN WG1

Document for:

WG1 would like to thank WG2 for providing feedback on the FACH requirements and has taken necessary action to introduce TFCI bits for the secondary CCPCH in specification documents in the next WG1 meeting No. 4 in April.

In connection with this proposal was made to WG1 (Tdoc 200/99) on multicast channel structure for which it was concluded that no new physical channel would be required for such a transport channel after the addition of TFCI bits to the secondary CCPCH. Thus possible adoption of such a transport channel for UTRA is seen as a WG2 issue.
