Title: Liaison statement to TSG-S4 on radio simulator capabilities
Document for: Information
Agenda Item: 4.1

TSG-RAN Working Group 4 (Radio) meeting #7
Tokyo 7 - 10 September 1999

TSGR4#7 (99)536

Source: RAN WG4
Title : Liaison statement on radio simulator capabilities
To : TSG-S4 Codec Working Group
Copy : TSG-R1, TSG-SA, TSG-RAN

3GPP RAN WG4 would like to thank RAN WG1 for having sent a liaison statement [1] on the support of Speech Service in RAN and has considered the issues related to RAN WG4.

RAN WG1 mentions that “RAN WG1 does not own a radio simulator capable of providing such error patterns and encourages SA4 to check whether RAN WG4 could help them on this issue”..

RAN WG4 wants to inform SA4 that members of RAN WG4 are performing radio link level simulations for the purpose of RAN WG4 specifications, but error patters are outside the scope of these specifications. Therefore RAN WG4 does not have the capabilities to support the need of SA4. However individual companies may have the needed capabilities in the radio simulator.
