

Technical Specification Group Services and System Aspects  
Meeting #7, Madrid, Spain, 15-17 March 2000

**TSGS#7(00)0110**

**Source:** 3GPP SA WG2, ETSI SMG12  
**Title:** Reply to Liaison on TIPHON Quality of Service  
**Agenda Item:** 5.2.3  
**To:** EP TIPHON WG 5  
**Cc:** 3GPP SA WG1, WG3, WG4

*TSG-SA WG2 meeting #11*

*TD000307*

*Puerto Vallarta, Mexico, 24-28 January, 2000*

TSG SA WG2 thanks EP TIPHON WG 5 for their Liaison Statement S2-000095 relating to TIPHON Quality of Service (QoS). We agreed a closer working relationship to harmonise the work in the Quality of Service area is welcome.

TSG SA WG2 QoS is focusing on the distribution QoS requirements within a UMTS PLMN and evolved GSM PLMN (i.e. distribution of the QoS requirement for the entities within the Radio Access Network and for the entities within the Core Network).

In order to establish the exchange of knowledge in QoS, we would like to request the EP TIPHON WG 5 to provide an overview and highlight its QoS specifications (listed in the liaison statement) in a presentation contribution format.
