Title: Handling of further studies items and editor's notes in documents for TSG approval
Document for: Discussion
Agenda Item:

Proposal

It has become apparent that Editor's Note's have not always been applied to highlight "For Further Study" (FFS) Items in a consistent manner. Many authors of contributions did not clearly mark FFS items with an Editor's Note when the R99 specifications were under development. The result has been that many specifications were declared stable, whilst they contained FFS items.

Lucent Technologies asks that a clear statement be made that all FFS items should be clearly marked with Editor's Note. It is proposed that SA request MCC to ensure that the drafting rules governing the use of Editor's Notes are applied by the Working Groups.
