RE: The availability of Motorola's GPRS test capability.

Dear Sir/Madam,

With reference to the recent discussions in 3GPP regarding the testing of GPRS terminals, especially regarding the testing of the packet control channels, Motorola has evaluated the possibility of making its GPRS terminal testing capability available for the industry.

It is with great pleasure that Motorola would like to inform you that is our intention to make the Motorola GPRS terminal testing capability available for the industry. We are currently working on the practical aspects of this.

Motorola believes this course of action to be in the best interests of our industry and we are certain that it will be a key factor in the worldwide success of GPRS.

We are looking forward to co-operating with you on this issue.

Sincerely

A handwritten signature in cursive script, appearing to read 'S. Srinivas'.
