## CHANGE REQUEST

⌘ **41.102 CR 002** ⌘ ev **-** ⌘ Current version: **4.1.0** ⌘

For **HELP** on using this form, see bottom of this page or look at the pop-up text over the ⌘ symbols.

**Proposed change affects:** ⌘ (U)SIM  ME/UE  Radio Access Network  Core Network

<b>Title:</b>	⌘ Correction to list of specifications		
<b>Source:</b>	⌘ MCC ( <a href="#">John M Meredith</a> )		
<b>Work item code:</b>	⌘ TEI	<b>Date:</b>	⌘ 2001-09-11
<b>Category:</b>	⌘ <b>F</b> Use <u>one</u> of the following categories: <b>F</b> (correction) <b>A</b> (corresponds to a correction in an earlier release) <b>B</b> (addition of feature), <b>C</b> (functional modification of feature) <b>D</b> (editorial modification) Detailed explanations of the above categories can be found in 3GPP <a href="#">TR 21.900</a> .	<b>Release:</b>	⌘ Rel-4 Use <u>one</u> of the following releases: 2 (GSM Phase 2) R96 (Release 1996) R97 (Release 1997) R98 (Release 1998) R99 (Release 1999) REL-4 (Release 4) REL-5 (Release 5)

<b>Reason for change:</b>	⌘ Specs have been stopped / created.		
<b>Summary of change:</b>	⌘ Additions / deletions to table of specs for this release		
<b>Consequences if not approved:</b>	⌘ FUD		

<b>Clauses affected:</b>	⌘ 5			
<b>Other specs affected:</b>	<input type="checkbox"/> Other core specifications <input type="checkbox"/> Test specifications <input type="checkbox"/> O&M Specifications	⌘		
<b>Other comments:</b>	⌘ The table of specs has been re-ordered to be sorted by Spec number rather than the notional index based upon the (possibly hypothetical) progenitor Spec. This makes it easier to find a given Spec, and more intuitive in use. However, the result is that the present CR simply deletes the entire table and replaces it with another. This makes it difficult to detect the additions and deletions. Therefore, the tables below summarize the changes:  Table A: Specs added			
	22.048	Security mechanisms for the (Universal) Subscriber Interface Module (U)SIM Application Toolkit; Stage 1	T3	Yes

43.046	Technical Realization of Facsimile Group 3 Service - non transparent	N3	Yes
44.004	Layer 1 - General Requirements	G2	Yes

Table B: Specs removed

24.004	Layer 1 - General Requirements	G2	Yes
42.048	Security mechanisms for the SIM Application Toolkit; Stage 1	T3	Yes

### How to create CRs using this form:

Comprehensive information and tips about how to create CRs can be found at: [http://www.3gpp.org/3G\\_Specs/CRs.htm](http://www.3gpp.org/3G_Specs/CRs.htm). Below is a brief summary:

- 1) Fill out the above form. The symbols above marked ⌘ contain pop-up help information about the field that they are closest to.
- 2) Obtain the latest version for the release of the specification to which the change is proposed. Use the MS Word "revision marks" feature (also known as "track changes") when making the changes. All 3GPP specifications can be downloaded from the 3GPP server under <ftp://ftp.3gpp.org/specs/>. For the latest version, look for the directory name with the latest date e.g. 2001-03 contains the specifications resulting from the March 2001 TSG meetings.
- 3) With "track changes" disabled, paste the entire CR form (use CTRL-A to select it) into the specification just in front of the clause containing the first piece of changed text. Delete those parts of the specification which are not relevant to the change request.

## 5 Specifications and Reports

Specifications in the range 01.xx to 13.xx are 'pure' GSM specs - that is, those required to build systems with a GERAN air interface. Those in the range 21.xxx to 35.xxx are common to GSM and UMTS implementations - that is, to systems with either GERAN or UTRAN air interfaces.

The first column shows the prior Release specification number, if any, corresponding to the spec number given in the second column.
