**Source:** Chairman SA WG3, Ericsson, Siemens  
**Title:** Resolution on IMS Integrity Protection  
**Document for:** Information  
**Agenda Item:** 7.3

---

Regarding the decision on whether to select IPSec or HTTP Digest as the mechanism for IMS Integrity Protection, it has been agreed between the involved parties that it is premature to take a decision during TSG SA #15. It is considered important that 3GPP member companies are given sufficient time to evaluate the two proposals and take a well-informed decision.

It was acknowledged by the involved parties that a decision on this matter is urgent to progress stage 3 work.

It has been agreed to utilize a vote by correspondence in TSG SA WG3 as the means of reaching consensus. The voting will end on March 27, 2002. The voting will be by correspondence using the appropriate tools provided by MCC. The voting shall follow the following principles:

- Members eligible for voting shall be in accordance with the working procedures.. List of voting members will be prepared by MCC.
- Before the voting, the issue shall be clearly defined by the SA WG3 chairman on the SA WG3 e-mail list. The question asked shall be: "Shall A) IPSec or B) HTTP Digest be selected as the IMS Integrity Protection mechanism?"
- The proponents have confirmed that the proposal receiving the lower number of votes will be withdrawn.

This process will secure that sufficient time is given to TSG CN to progress the required stage 3 specifications.
