**Title:** **3GPP TS 41.103 v1.1.0:**  
**"GSM Release 5 specifications"**

**Document for:** **information**

TS 21.103 lists the 3GPP specifications for a Release 5 system with GERAN. This is a draft for information, and the table of specs is far from complete. It shows those specs and reports which either exist already or which the TSGs have shown a clear intention of producing. Additionally, information on the freeze date for each spec is shown (see 21.900).

Following the freeze of Rel-5 (anticipated at SA#15), the remaining specs can be identified and 41.103 can be brought under change control.
