22

23 Dear Sir,

24

25 GGRF G95 would like to thank 3GPP2, TR45.2 and TR46.3 for their work in support of  
26 CDMA-GSM roaming.

27

28 At the March meeting of G95 in Madrid, there was agreement that there is a market need  
29 for CDMA Packet Data Service for GSM/GPRS subscribers who roam into a CDMA  
30 network. These requirements include support for simultaneous voice and data, simple IP  
31 and mobile IP as specified in IS-880. Standards are required to support this capability in  
32 the network, handset and R-UIM/SIM.

33

34 J-STD-038-B is expected to support GPRS Foreign Mode Service for ANSI-41  
35 subscribers. The enabling standards are needed for GSM/GPRS subscribers in a CDMA  
36 network.

37

38 GGRF and G95 would appreciate your assistance in addressing these standards  
39 requirements and responding with a proposed work plan for each of the relevant working  
40 groups. G95 will be meeting again June 19-20 in Mexico and will be happy to undertake  
41 coordination of this work.

42

43 Your sincerely,

44

45
