Title: ⌘	Introduction of the definition of Service Specific Entities in TS 21.905	
Source: ⌘	SA1	
Work item code:⌘	OAM-AR	*Date:* ⌘ 20/01/2003

Category: ⌘	**F**		*Release:* ⌘	REL-5
	Use one of the following categories:		*Use one of the following releases:*	
	F *(correction)*		*2*	*(GSM Phase 2)*
	A *(corresponds to a correction in an earlier release)*		*R96*	*(Release 1996)*
	B *(addition of feature),*		*R97*	*(Release 1997)*
	C *(functional modification of feature)*		*R98*	*(Release 1998)*
	D *(editorial modification)*		*R99*	*(Release 1999)*
	Detailed explanations of the above categories can		*Rel-4*	*(Release 4)*
	be found in 3GPP TR 21.900.		*Rel-5*	*(Release 5)*
			Rel-6	*(Release 6)*

Reason for change: ⌘	Valuable definition for high level grouping of entities of the mobile system related to specific services. SA5 specifically requested this as it relates to their ongoing Release 5 activities.
Summary of change:⌘	Introduction of the definition of Service Specific Entities and related abbreviation SSE.
Consequences if not approved: ⌘	Inconsistent use of terms and definitions.

Clauses affected: ⌘	3, 4

		Y	**N**		
Other specs affected: ⌘			**X**	Other core specifications ⌘	
			X	Test specifications	
		X		O&M Specifications	

Other comments: ⌘	The specific entities of the mobile system that are dedicated to the provisioning of a given (set of) service(s) are presented in 3GPP TS 23.002 V5.7.0. The highlevel grouping of all these entities is a valuable concept for a better understanding of the mobile system and ultimately help to easier identify common requirements and solutions in the area of Telecom Management.

How to create CRs using this form:
Comprehensive information and tips about how to create CRs can be found at http://www.3gpp.org/specs/CR.htm.
Below is a brief summary:

1) Fill out the above form. The symbols above marked ⌘ contain pop-up help information about the field that they are closest to.

2) Obtain the latest version for the release of the specification to which the change is proposed. Use the MS Word "revision marks" feature (also known as "track changes") when making the changes. All 3GPP specifications can be downloaded from the 3GPP server under ftp://ftp.3gpp.org/specs/ For the latest version, look for the directory name with the latest date e.g. 2001-03 contains the specifications resulting from the March 2001 TSG meetings.

3) With "track changes" disabled, paste the entire CR form (use CTRL-A to select it) into the specification just in front of the clause containing the first piece of changed text. Delete those parts of the specification which are not relevant to the change request.

The following definition is requested to be included under clause 3 "Terms and definitions":

Service Specific Entities: Entities dedicated to the provisioning of a given (set of) service(s). The fact that they are implemented or not in a given PLMN should have limited impact on all the other entities of the PLMN.

The following abbreviation is requested to be included under clause 4 "Abbreviations":

SSE   Service Specific Entities
