1. Overall Description:

At its plenary meeting of 17-20 March 2003, the 3GPP Services and System Aspects Technical Specification Group (TSG-SA) reviewed your Liaison regarding the OMA m-Commerce WG Questionnaire to 3GPP. After some discussion it was determined that individual Member companies, rather than the TSG-SA could best answer the questionnaire. Therefore, TSG-SA encouraged its membership to consider providing feedback to the OMA m-Commerce Working Group, to get a business/commercial view.

The charging aspects developed within 3GPP are contained in the 32-series specifications, which are the responsibility of the TSG-SA Working Group 5. Those and all other 3GPP specifications are freely available and can be downloaded from the 3GPP server under ftp://ftp.3gpp.org/specs/. For the latest version of a specification, look for the directory name with the latest date e.g. 2003-03 contains the specifications resulting from the March 2003 TSG meetings.

2. Actions

SA5:

Assure that the Liaison regarding the OMA m-Commerce WG Questionnaire to 3GPP is available to the Individual Member companies in SA5 and ask them to consider providing feedback to the OMA m-Commerce Working Group.

3. Date of Next TSG-SA Meetings:

SA#20   9th – 12th June 2003   Hämeenlinna FI
