How to create CRs using this form:

Comprehensive information and tips about how to create CRs can be found at http://www.3gpp.org/specs/CR.htm. Below is a brief summary:

- 1) Fill out the above form. The symbols above marked ∠ contain pop-up help information about the field that they are closest to.
- 2) Obtain the latest version for the release of the specification to which the change is proposed. Use the MS Word "revision marks" feature (also known as "track changes") when making the changes. All 3GPP specifications can be downloaded from the 3GPP server under ftp://ftp.3gpp.org/specs/ For the latest version, look for the directory name with the latest date e.g. 2001-03 contains the specifications resulting from the March 2001 TSG meetings.

3)	of the clause containing the relevant to the change reque	first piece of changed text.	n (use CTRL-A to select it) in Delete those parts of the sp	nto the specification just in front ecification which are not

1 Scope

This TS defines the stage one description for digital rights management. Stage one is the set of requirements that shall be supported to enable digital rights management, from content packaging to secure storage and rendering.

This TS includes requirements applicable to the content authors and providers, UE and network manufacturers, which are sufficient to provide complete support of digital rights management.

Additional functionalities not documented in this TS are considered outside the scope of this TS. Such additional functionality may be on a network-wide basis, nation-wide basis or particular to a group of users. Such additional functionality shall not compromise conformance to the requirements of the rights management system defined in this specification.

Note: Stage 2 and Stage 3 requirements shall be adopted from the corresponding DRM specifications by OMA (Open Mobile Alliance).

*** END OF MODIFICATION ***
