1. Overall Description:

CN5 have been informed by SA1 that further work is required to define how the User Data Management Function is implemented in the network. As a result, SA1 requested SA2 to review the requirements and to introduce the User Data Management Service Capability Feature (SCF) in TS 23.127. In their liaison statement CN5 informed SA2 that CN5 are not able to progress the definition of the Stage 3 enhancements for this new Release 6 capability until SA2 provide guidance on the architectural implications.(N5-030286).

SA2 would like to inform CN5 that there seems to be no interest in the topic among the companies attending SA2. No contributions were received on the subject even after explicit invitation. Thus SA2 regrets that we cannot provide an update of TS 23.127.

2. Actions:

To CN5 WG

ACTION: SA2 asks CN5 to note the above status information from SA2 and adjust work planning accordingly.

3. Date of Next SA2 Meetings:

Meeting	Date	Location
#35	27.-31. October 2003	Bangkok, Thailand
#36	24.-28. November 2003	Sophia Antipolis, France
