Title: NRPCA Conclusion for 23.976

Agenda item: 7.2.3 (SA2)

Document for: Approval

Introduction

The meeting of SA2# 38 did not reach a consensus decision regarding the inclusion of Network Requested PDP Context Activation into the Release 6 specifications.

This contribution to SA proposes the inclusion of NRPCA into the Release 6 specifications. The following text is suggested to be added to the Push TR 23.976.

Proposed text

6 Analysis and Conclusion

****** New Text ******

This Technical Report has concluded that NRPCA with Dynamic IP Address Assignment is a feature that shall be standardised in 3GPP Release 6 specifications.
