

14 - 17 March 2005, Tokyo, Japan

Title: Revised WID for the work item: UE Antenna Performance Evaluation Method and Requirements (RP-050122)

Agenda: 8.4.1

Source: TSG RAN

Introduction

At RAN#26 a WI on a UE antenna performance evaluation method and requirements was approved. Below, a modified version of the agreed WID [RP-040521] is provided, endorsed by RAN4 at the RAN4 meeting #34, adding

- a link to the corresponding GERAN WI “MS Antenna Performance Evaluation Method and Requirements” based on the LS on Antenna Performance Evaluation Method and Requirements received by RAN4 from GERAN (R4-050071, GP-050541),
- an additional supporting company,
- a clarification of the responsibilities between RAN4 and GERAN.

Work Item Description

Title: **UE Antenna Performance Evaluation Method and Requirements**

1 3GPP Work Area

X	Radio Access
	Core Network
	Services

2 Linked work items

[GERAN WI: "MS Antenna Performance Evaluation Method and Requirements" \[GP-050284\]](#).

3 Justification

The UE antenna performance has critical impact on both system performance (throughput) and coverage. In order to ensure a certain level of coverage and QoS for the user, minimal requirements for UE antenna performance are necessary.

4 Objective

The aim of this work item is to

1. introduce a UE antenna performance evaluation method
2. define UE antenna minimal performance requirements

in the 3GPP specifications, for the speech mode (UE close to head).
