## Liaisons to SA

- **(CSI) IOT in 3GPP (SP-050366)**
  - This LS replies to CP-050110 from CT1
  - Should 3GPP define IOT test cases?
  - Which group should define the TCs?
- **DCC sub-sessions (SP-050364)**
  - Flow-based charging is defined for Rel-6, using DCC sub-sessions, but should CT3 study a more optimal solution?
  - Related Rel-6 extension sheet is in CP-050368
- **Cherry picking of features (SP-050202)**
  - Can UE support features of later releases (DSAC, NW sharing)?
  - If it can, then how should these be documented?
- **USIM TCs in frozen releases (SP-050365, for SA info)**
  - FASMO rule applies also to TC CRs
  - Specific phone book TC CRs will not apply on R99 and Rel-4

## Liaisons outside 3GPP

- **Profile for CS-IMS interworking (CP-050256 -> TISPAN)**
  - CR to introduce H.248 profile template to 29.332 was approved
  - CT liaised to 3GPP would like to co-operate with TISPAN in this area, to avoid duplicated specifications
- **ITU-R submission reviewed, comments given before CT**
- **GSMA comments on WLAN (CP-050119)**
  - Related CRs were approved
- **OMA (CP-050122 – 123)**

  - Discussion on CP in Rel-6 ongoing (ext. form in CP-050218)
- **ETSI TC (CP-050146)**
  - CT is aware of the eCall requirements but waits for SA guidance, based on existing SA2 WID
