**Re: 3GPP2 SC.R4005-0 v1.0 cdma2000 M2M Numbering
Recommendations System Requirements Document**

Dear Industry Leaders:

In March 2010, the 3GPP2 Steering Committee (SC) directed the initiation of an SC-level AdHoc to consider issues related to M2M numbering and addressing schemes. On 12 April 2010, the 3GPP2 SC Numbering AdHoc was convened.

Since that time, under the leadership of AdHoc Chair, David Crowe (CDG), the AdHoc has met regularly and worked diligently to develop a 3GPP2 M2M Numbering Recommendations System Requirements Document. That report has now been approved for publication as SC.R4005-0 v1.0 cdma2000^{®1} M2M Numbering Recommendations SRD and is attached for your reference.

¹ cdma2000[®] is a trademark for the technical nomenclature for certain specifications and standards of the Organizational Partners (OPs) of 3GPP2. Geographically (and as of the date of publication), cdma2000 is a registered trademark of the Telecommunications Industry Association (TIA-USA) in the United States.

For those of you that submitted comments or otherwise supported the activities of this AdHoc, please accept our sincere gratitude.

Regards,

Cheryl Blum
Chair, 3GPP2 Steering Committee
