
Title: Liaison to 3GPP on TTC's white paper on future mobile networking
Source: TTC Ad-hoc Group on Future Mobile Networking
To: 3GPP SA, SA1
Date: 9 April 2015
Contacts: Takatoshi Okagawa (leader of the Group, NTT DOCOMO),
Michiaki Hayashi (deputy leader of the Group, KDDI Labs.)
Attachments: white paper of TTC Ad-hoc Group on Future Mobile Networking.

It is a great honor to inform you that TTC provides herewith our white paper on future mobile networking.

Since September 2014, TTC has studied future mobile networking around 2020 and beyond in various aspects, incl. mobile core network, mobile back-haul, mobile front-haul, security, and network management. And the study has identified technical challenges, surveyed candidate solutions, and considered future directions. TTC has recently finalized the white paper, and it is attached to this liaison. The key messages are captured in section 8.

TTC hopes our white paper is of use for further development of future mobile networking in 3GPP.
